OVERVIEW

“JUNKANOO” is a timeless Hatteras Widebody Cockpit Motor Yacht whose classic lines have been sensitively modernized and lovingly maintained; this elegant flybridge yacht is precisely configured for bluewater passages and comfortable liveaboard life. The profile was sleekened when the flybridge windshield was removed and replaced with a new three-sided Strataglass enclosure in 2023, and a Precision Marine custom aluminum frame sun awning now shades the aft deck and cockpit. Structural and hull work includes full blister repair and fresh bottom paint (2023), new dripless shaft logs (2023), and a custom anchoring arrangement with a modified chute built to accommodate a 110 lb Bruce anchor.

Systems and comfort upgrades are extensive: a 25 kW Northern Lights genset was added to complement the yacht’s 20 kW Onan, with new generator batteries; new main and house batteries were installed in September 2023; a FLO SCAN fuel monitoring system and onboard fuel polishing keep the fuel system pristine; and a FCI (Reverse Osmosis of Florida) 1800 GPD watermaker supports long-range self-sufficiency. The galley was refreshed with new countertops and cabinetry and a rebuilt refrigerator (2023), and new ASKO washer and dryer were added in 2023. Electronics and entertainment include KVH TracVision satellite TV, BOSE surround sound in the salon, and Fusion audio at the bridge. Seakeeping and maneuvering have been dramatically improved with Naiad stabilizers fully rebuilt and fins upsized from 4.5 to 7.5 with new seals and bearings (9/2023), and a bow thruster with remote was installed in 2023. All heads have been converted to freshwater and a new electric Raritan head plus Electro-San treatment system were installed in January 2025; additional 2025 service includes a new water heater and two new A/C pumps. Numerous other upgrades and refinements throughout the vessel attest to her pedigree as a cockpit motoryacht and flybridge motor

yacht equally suited to luxury cruising, coastal passagemaking, long range voyaging, or refined liveaboard life.

DETAILED DESCRIPTION

Accommodations

The master stateroom is beautifully appointed and impressively spacious, featuring a separate dressing room and a fully refreshed, supremely comfortable décor that invites effortless relaxation, while midship the guest stateroom offers twin berths with a nightstand between, complemented by an abundance of drawer space and generous hanging lockers to keep belongings perfectly organized for extended cruising.

Galley

The galley has been beautifully remodeled throughout to elevate both form and function, where Corian countertops and a matching dinette table set a refined tone and refinished cabinetry with new thermofoil doors delivers a crisp, modern look; premium appliances include an Amana 32" refrigerator/freezer with top-load access, a Whirlpool four-burner cooktop paired with a self-cleaning oven, and a Whirlpool overhead built-in microwave oven, complemented by a Frigidaire dishwasher and an Insinkerator heavy-duty garbage disposal, while durable vinyl wallcoverings enhance longevity and ease of care and fresh-water shutoff valves have been thoughtfully installed for added peace of mind.

Flybridge

The flybridge presents a fiberglass hardtop with radar arch for clean lines and robust protection, anchored by a new Stratoglass three-side enclosure with U-zips added in 2022 and custom aluminum handrails fitted beneath the hardtop, while at the helm two cushioned Pompanette seats face a covered

station crowned by a hinged, fold-down mast and a full U-shaped seating area provides abundant storage below along with fresh cushions from 2023 and protective covers; entertainment and utility are equally considered with four speakers powering a dedicated Fusion bridge audio system installed in 2020, two icemakers integrated into a custom fiberglass bar unit with cover, and a Garmin GPS installed in 2020, and tender handling is effortless with a 2006 Flexboat tender measuring 14' with a 60 HP four-stroke engine managed by an 1100 lb. davit.

Pilothouse

The pilothouse is comprehensively equipped for confident navigation, featuring dual Furuno NavNet systems with 72-mile radar, GPS, chartplotter, sounder, sea-temperature monitoring, and a closed-circuit cockpit camera, while a Garmin autopilot installed in 2020 enhances passage-making ease and a SIMRAD IS-12 windspeed indicator, ICOM ICM-402 VHF radio, and a Ritchie compass round out a capable, professional-grade helm.

Engine and mechanical equipment

Mechanically maintained to a high standard, the main engines have been thoroughly serviced to date and are complemented by a chrome package that is now due for renewal, with power transmitted through Twin Disc 2.5:1 MG514C gearboxes and breathing via Walker Air-Seps, complete mechanical engine gauges and tachometers installed in the engine rooms for precise monitoring, and an oil-change system serving the main engines; onboard climate control is delivered by a reverse-cycle air-conditioning system across seven zones with a dedicated condensation drainage system, safety is addressed by an automatic/manual CO2 fire-control system that has been completely recertified and kept current plus a suite of individual handheld fire

extinguishers—both large and smaller units—replaced with new, certified equipment, and fuel management includes dual Racor 1000 filters on the main engines with Diesel Tech magnets integrated into all filtration and polishing systems augmented by an additional 500 gallons of fuel capacity beneath the cockpit. Reliability and handling are further enhanced by new exhaust risers fitted in 2023, Bennett trim tabs, Glendinning engine synchronizers, a fresh-water cooling system, and an engine alarm with emergency stop, while two bilge blowers, Hynautic hydraulic steering, raw-water sea strainers, and engine fuel shut-off-selector valves add confidence; a new electric holding-tank pump-out and four bilge pumps—both manual and automatic—provide robust serviceability, and power generation comes from a Northlights generator with approximately 2,700 hours (to be verified) and an Onan generator with approximately 3,200 hours (to be verified).

Remarks

Junkanoo has returned to Fort Lauderdale, Florida, and is easy to show on short notice—an inviting opportunity to step aboard and appreciate her upgrades firsthand.
