## OVERVIEW

---

DOROTHY ANN is a 2013 Pershing 82 motor yacht that underwent an owner-financed, comprehensive refit during 2024–2025 and now presents as a turnkey, performance-focused yacht. She offers accommodation in three ensuite staterooms and is powered by twin MTU 16V 2000 M93s coupled to TOP SYSTEM surface drives, and is Cayman-flagged.

# DETAILED DESCRIPTION

---

## Overview

---

DOROTHY ANN is a 2013 Pershing 82, built in Cattolica, Italy by Pershing S.p.A. / Ferretti Group. Conceived by Fulvio De Simoni with naval architecture from the Ferretti Engineering Department, she blends Pershing's trademark high-performance sport-yacht silhouette with a practical three-stateroom interior, expansive exterior guest areas, and TOP SYSTEM surface-drive performance.

An owner-funded refit completed in 2024–2025 delivered a comprehensive renewal that addressed cosmetic and comfort details as well as electronics, audio, deck, air-conditioning, machinery, hydraulic, and electrical systems. The result is a fast, up-to-date Pershing 82 presented with refreshed finishes and targeted investments in precisely the areas discriminating buyers examine most closely.

## Refit and recent work

---

During the 2024–2025 refit the yacht received a thorough transformation, beginning with a bespoke exterior paint scheme and newly laid teak decking across the side decks, foredeck, cockpit and flybridge, complemented by custom teak tables. The interior was refreshed with new salon furniture, replacement flooring and an elegant leather salon headliner. Onboard comfort and entertainment were upgraded with a modernized stereo, new Sunbrella cushions and protective covers, and three tailor-made sunshades mounted on carbon-fibre poles with dedicated fittings; electronics were overhauled and Starlink installed to ensure seamless connectivity. Mechanical and operational reliability were addressed with rebuilt air-conditioning, up-to-date engine

servicing, serviced TOP SYSTEM drives and extensive hydraulic and electrical work throughout the vessel.

## Accommodations and layout

---

DOROTHY ANN's interior is arranged to maximize comfort and privacy, featuring three ensuite guest staterooms—a full-beam master, a forward VIP and a twin guest cabin—collectively accommodating up to eight guests in an atmosphere of refined elegance. Two crew are berthed in a single crew cabin with an adjacent crew head, ensuring discreet and attentive service throughout every journey.

## Performance and machinery

---

A pair of MTU 16V 2000 M93 diesel powerplants, each rated at 2,435 hp, are mated to TOP SYSTEM surface drives that turn five blade propellers, resulting in a reported top speed of 45 knots, a cruising speed of 40 knots and a range of 310 nautical miles at cruise. Current engine hours are approximately 1,600 on each unit.

## Deck and exterior

---

Underpinned by a deep V GRP planing hull and a GRP superstructure, the yacht is presented in a bespoke paint finish and fitted with graceful teak decking. The exterior guest zones—cockpit, foredeck, side decks and flybridge—have been enhanced with recent work on the teak, cushions, covers, tables and sunshades, reshaping them into refined al fresco spaces designed for effortless enjoyment.

---

## Interior, entertainment and systems

---

Following an extensive recent refit, the interior has been transformed with newly configured salon seating, pristine new flooring, a supple leather headliner, refreshed bedding, enhanced audio components and fully rebuilt air-conditioning systems that now operate more quietly and with greater efficiency throughout the yacht. Starlink provides uninterrupted connectivity, while an intelligently conceived layout presents three ensuite guest cabins alongside dedicated crew accommodation, ensuring discreet service and absolute privacy.

---

## Bridge electronics and navigation

---

Following a comprehensive refit, the bridge systems have been fully modernized and enhanced with Starlink to deliver uninterrupted, high-capacity connectivity wherever your voyages take you. Specifically tuned to the Pershing's high-speed operating profile, the integrated navigation and control suite offers pinpoint handling and rapid data integration, and all principal systems were refreshed during the 2024–2025 yard period to ensure optimal reliability and peak performance.
