OVERVIEW

A BESPOKE VESSEL WITH A RICH HISTORY AND A MODERN HEART

Step aboard SOARIS, an exquisite Aicon 85 flybridge motor yacht whose construction began in 2009, was paused, and later recommenced with entirely new machinery and systems before reaching final completion in 2014. First registered in 2018, she accommodates 8 guests across 4 cabins and presents a spacious 46 m² salon, while twin CAT C33 engines propel her to speeds of up to 34 knots—an assertive planing performance cruiser rendered with superyacht elegance.

Comprehensively refitted in 2024 and showing low engine hours, SOARIS is presented turnkey and ready to sail without delay.

Key highlights:

Low engine hours

Recent modern refit (2024)

Commercially registered (charter-ready)

Attractively priced

Luxury motor yacht • Flybridge yacht • Sport yacht • Performance cruiser •

Charter yacht

DETAILED DESCRIPTION

Propulsion & steering

Hydraulic steering delivers a precise, connected helm feel to twin shaft-line propellers driven through a CAT gearbox, while low-speed agility and docking finesse are assured by Sleipner sp2401 bow and stern thrusters, giving confident control in tight marinas and open water alike.

Safety & security

Safety is comprehensive: an EPIRB stands ready; life rafts for 12 persons and 12 life jackets are on board; fire protection includes 14 powder fire extinguishers plus an automated fire suppression system in the engine room; shipwide alerts run through an integrated domotics system with intrusion alarms on the security cameras; bilge and fire pumps are fitted fore and aft, one forward and one aft; a powerful searchlight and a full suite of security cameras complete the watch, creating a layered, reassuring safety posture for guests and crew.

Communication & navigation equipment

Always connected via broadband Internet, VHF, a telephone exchange, a handheld VHF radio, and a printer/fax, the bridge further benefits from a Riviera Genova Whitestar magnetic compass and matching gyro compass, while the Raymarine suite provides comprehensive situational awareness with log, a 120 m depth sounder, sonar, autopilot, radar, electronic chart system, GPS, and wind speed and direction instrumentation to keep passages precise and safe.

Electrical

Built on a 24 V, 50 Hz platform with a shore power converter and a 3 kWh inverter, the system draws on robust batteries: eight by 24/250 V/Ah for services and ten by 24/112,5 V/Ah for thrust engines, delivering reliable power distribution for hotel systems and propulsion auxiliaries both at sea and alongside.

Mechanical

Engineering is thoughtfully specified: a fuel settling tank with five fuel filters ensures clean delivery, centralized fan coil air conditioning serves the entire yacht and all cabins, and wastewater is contained in a one thousand litre holding tank with discharge pump. An automatic coalescing oily water separator protects the sea, the vacuum toilet system is efficient and quiet, and hot water is supplied by two boilers of 88 l each, all arranged to maximize reliability and environmental responsibility.

Deck

On deck, a primary 50 kg anchor is paired with 80 m of chain, handled by an electric windlass. Instead of cranes, dedicated winches and a support structure manage tender handling, while a hydraulic telescopic retractable passerelle and a matching hydraulic telescopic retractable bathing ladder ease boarding and water access. Shade comes courtesy of a bimini top, and stern handling is simplified by reversible capstans to port and starboard, one to port and one to starboard, making day to day deck operations intuitive and elegant.

Galley & laundry

The galley and utility spaces are equipped for effortless hospitality, with two refrigerators and one freezer, an induction Whirlpool stove complemented by a Samsung microwave, and no oven by design; daily convenience is assured with an icemaker, dishwasher, and washing machine so service runs smoothly whether underway or at anchor.

Audiovisual

Entertainment is immersive: TV/DVD screens are installed throughout—one external, one in the main room, and one in each cabin—for a total of six, with satellite integration via Smart TVs – Glomex and rich, room filling sound delivered by the BOSE music system to create a cinematic ambience across deck and interior spaces.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
