OVERVIEW

The Ferretti Yachts 860, delivered new in 2023, is an 88-foot expression of contemporary Italian yachtmaking that marries spirited performance with refined onboard living. Created for owners who value swift, comfortable passages and effortless family cruising, this elegant flybridge vessel offers an engaging experience at sea while retaining the unmistakable sophistication of Ferretti design. Lying in Malta and flying the Malta flag, she is ideally positioned for Mediterranean cruising and easy island hopping.

Presented in modern, lightly used condition, the yacht is driven by twin MAN V12 engines of 2 x 2000 hp with approximately 300 hours, producing a relaxed fast-cruise of 28 knots and a top speed of 32 knots—perfect for quick transits between bays and ports. An estimated range of some 800 nautical miles combines performance with practical passage-making, while a stabilizer package that pairs traditional fins with a Seakeeper gyroscopic unit significantly reduces roll both underway and at anchor. Precise low-speed handling is facilitated by bow and stern thrusters, and boarding, swimming and tender operations are simplified by a hydraulic swim step and hydraulic bathing platform. Full air conditioning throughout ensures comfortable living in warm Mediterranean conditions.

As a high-performance flybridge motor yacht she benefits from a deep-vee hull that gives composed, confidence-inspiring behavior at speed. Her proportions—26.95 m (88.42 ft) overall length, 23.95 m (78.58 ft) at the waterline, a generous 6.22 m (20.42 ft) beam and a 2.08 m (6.83 ft) draft—deliver impressive interior volume and expansive exterior living areas for a yacht of this size. The vessel's dry weight is 158,733 lb / 72.0 t with a gross tonnage of 82 t, and propulsion is provided by the twin MAN V12s on direct drive shafts fed by a robust diesel system.

Accommodation is arranged for up to eight guests in four well-appointed

cabins, centred around a full beam owner's suite, a spacious VIP stateroom and two guest cabins, each finished with contemporary materials for a calm, luxurious atmosphere. Separate crew quarters accommodate three crew in two cabins, ensuring professional service and privacy during extended cruises. Outdoor spaces are a defining feature: a teak-laid cockpit flows seamlessly into the saloon and offers elegant alfresco dining and lounging, while the sizeable flybridge is arranged with generous seating, sunpads and sociable zones ideal for daytime relaxation or evening entertaining beneath the stars. At anchor the hydraulic swim platform converts the stern into a private beach for swimming and water-toy deployment, and teak side decks and carefully considered detailing lend classic nautical refinement throughout.

Capacities and onboard systems are arranged for extended time afloat, with 370 US gallons / 1,401 litres of fresh water and 1,849 US gallons / 7,000 litres of fuel. Interior equipment includes full air conditioning, a dishwasher, refrigerator, deep freezer, electric heads, a seawater pump and a reliable battery charger, combining convenience with comfort. Navigation and electronics are comprehensive for a performance yacht of this calibre, encompassing GPS, radar, autopilot, AIS, VHF, depth sounder, log-speedometer, wind instruments and compass, while entertainment systems feature flat-screen TVs, radio, Wi-Fi and cockpit speakers. The technical suite is completed by a generator, inverter and shore power inlet, with the Seakeeper gyroscope and fin stabilizers working in concert and bow and stern thrusters providing confident manoeuvring.

Available now and ready for immediate enjoyment, this nearly new Ferretti Yachts 860 represents a rare chance to acquire a low-hours, high-specification flybridge motor yacht perfectly sited for Mediterranean exploration. A full photo and video package can be supplied on request.
