OVERVIEW

2024 Arksen 85

The Arksen 85 stands out as one of the most secure, versatile, and durable yachts in its category. This exceptionally efficient long-range explorer boasts a comprehensive standard specification, making it perfectly suited for global expeditions with a remarkable level of independence, while also being ideal for leisurely weekend getaways with family and friends. The first hull in the Arksen 85 series of aluminum expedition yachts, known as Project Ocean, is currently available for yacht sale.

You have the unique opportunity to own 50% of this extraordinary vessel through a fractional ownership arrangement or purchase it outright.

Crafted by the esteemed British shipyard Arksen, this flagship explorer is set to be launched on the Isle of Wight later in 2023. The design is the work of Humphreys Design, complemented by an elegant interior from Design Unlimited, both renowned UK firms.

Project Ocean accommodates six guests across three luxurious staterooms, featuring a master suite with a private office, a port guest cabin that can be configured as a double, twin, or triple, and a starboard guest cabin adaptable as a single or twin. Additionally, there is a twin crew cabin. The galley is seamlessly integrated with the saloon and dining area, all benefiting from breathtaking panoramic views.

Humphreys is celebrated for his expertise in hydrodynamics, having designed award-winning sailing yachts, and his naval architects have developed "a highly efficient low displacement/length ratio hull form, incorporating innovative features like twisted flow rudders to reduce resistance."

This hybrid yacht can effortlessly transition to zero emissions mode and operate in silent running when desired. According to the broker, "Its cutting-edge hybrid propulsion system, advanced stabilization technology, and

exceptional systems engineering enhance efficiency while minimizing emissions, noise, and vibrations."

This explorer yacht for sale is MCA compliant and boasts an impressive range of 7,000 nautical miles, powered by a Praxis hybrid system. It also includes storage for a tender of up to 5.5 meters LOA and various water toys.

Designed for Adventurers, Crafted for Exploration

The Arksen 85 is primarily engineered as a long-range explorer yacht, adept at reaching remote destinations and navigating safely in extreme conditions, yet it excels in more accessible waters as well. Every detail of the yacht's design and construction is meticulously executed to ensure performance in diverse environments, including:

Summer operations in high latitudes with low sea and air temperatures

Tropical conditions with elevated temperatures and humidity

Navigating through adverse weather, high winds, and rough seas

Extended periods in isolated regions without external support

Full-time, permanent liveaboard capabilities
