OVERVIEW

SAL is a luxury motor yacht conceived to elevate onboard livability, introducing both interior and exterior innovations that reconceive spatial volume and impart a fresh sense of openness. The exterior, by Zuccon International Project studio, translates detailed stylistic research into elegantly proportioned lines and balanced volumes, while the interior by Patricia Urquiola approaches each space as inherently adaptable, bringing her distinctive, transformative aesthetic onboard. This Sanlorenzo SD90 semi-displacement superyacht accommodates six guests in three cabins: a full-beam Owner's suite positioned forward on the main deck, two refined VIP staterooms located amidships on the lower deck, and a family room with a private bathroom that can be converted into a twin or a double configuration with an additional Pullman berth. All guest areas are ensuite. Passenger comfort is assured by stabilisers that work both underway and at zero speed, and a shallow draft allows entry to secluded coves and shallow harbours. Sustainability is integral to the concept, with environmentally conscious materials chosen throughout, and the lower-deck salon's seamless conversion into a fully private ensuite cabin underlines the versatile layout and contemporary ethos of this sophisticated motor yacht.

DETAILED DESCRIPTION

Audio & visual equipment

A ceiling mounted television that deploys electrically enhances the salon, complemented by a matching electrically deployed unit in the VIP cabin to provide effortless, at the touch viewing throughout the yacht. The onboard entertainment is specified with the Diamond audio/video package—an upgraded alternative to the Silver standard—offering a fuller, more immersive media experience.

Machinery

Twin MAN i6 units (D2676LE423), each rated at 800 hp, provide assured propulsion with an exceptionally refined throttle feel and composed cruising characteristics. As of August 2026, the port engine has accumulated 1,417 hours and the starboard 1,420 hours.

Generators & auxiliary equipment

Twin Kohler generators form the yacht's electrical backbone, comprising a 35 kW unit paired with a 28 kW set, and showing, as of August 2026, 3,029 hours on the port generator and 3,035 hours on the starboard. A dedicated 12 V, 25 A charger is installed to maintain the generator batteries in optimal condition. Shore power is managed with refinement via a Glendinning CM7 Cablemaster serving a 50/63 A shore inlet, arranged as a single shore connection for simplicity. Practical convenience continues topside with waterproof 220 V outlets—one discreetly positioned within the flybridge bar cabinet and another at the fly helm station, the latter featuring integrated USB charging.

Ancillary equipment

An array of support systems has been carefully integrated to ensure effortless living aboard and precise handling, beginning with a Dometic air conditioning installation delivering 150,000 BTU/h for consistently refined climate control. Manoeuvrability is enhanced by both bow and stern thrusters, while active stabilizers provide comfort whether the yacht is underway or at anchor in zero-speed mode. A reliable water pressure pump services the domestic systems, and a comprehensive bilge management arrangement—comprising automatic, electric and manual pumps—secures peace of mind below deck.

Safety and security equipment

An exceptional suite of safety and security installations accentuates the yacht's vigilant engineering, featuring an advanced electronic fire system alongside a Panasonic IP CCTV system with DVR that incorporates a fixed camera in the cockpit and a pan-and-tilt unit in the engine room, complemented by a dedicated 12" touchscreen monitor for the ship monitoring system situated in the crew mess.

Communication equipment

An onboard VHF radio guarantees dependable ship-to-ship and ship-to-shore communications, complemented by a KVH TV8 TV-sat antenna that delivers robust satellite television reception. A KVH TV8 empty radome has also been fitted to maintain visual harmony and the yacht's clean profile while providing space to accommodate additional equipment in the future.

Navigation equipment

A Simrad autopilot forms the heart of the system, integrated with a network of four Simrad chartplotters to deliver effortless route management; a precision compass, depth sounder and dedicated display present essential readings, while electronic engine controls afford refined command. Positioning and situational awareness are ensured by Simrad GPS and Simrad radar, and the helm is completed by a log, odometer and rudder angle indicator that provide continuous, dependable feedback.

Deck equipment

Every element of the deck fit-out is tuned to provide effortless operation and refined luxury: twin anchors are handled by an electric windlass with an electric foot switch and an anchor chain washdown to keep the rode pristine, while bow and stern winches take the chore out of line handling. Boarding is made graceful by a fold-out gangway and a generous swim platform complete with a ladder and a refreshing deck shower. The cockpit and side decks are finished in teak to enhance the onboard atmosphere, and dual helm stations deliver precise control. Practical saddles secure the tender and a directional spotlight offers targeted illumination when needed. After dusk, four underwater LED lights—two set into the aft transom and two along the aft hull sides—cast a dramatic glow and improve visibility and safety around the waterline.

Galley and domestic equipment

Designed for shared, effortless entertaining, the galley boasts a Teppan yaki installed on the fly bar that serves both the stove and the oven/microwave, creating an elegant open air culinary station. A Vitrifrigo IM Classic icemaker,

relocated from the pantry to the galley, provides a steady supply of ice, while a wine cooler, available from Miele or Landel Webasto, holds 23 bottles and maintains your vintages at the perfect serving temperature.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

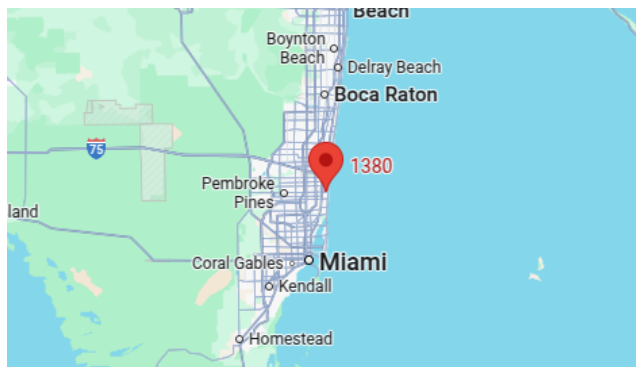

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
