## OVERVIEW

---

The 2020 Riva Argo KIYOMIZU is an enchanting fusion of heritage, strength, and design sophistication. Her impressive exterior, bright interiors, and adaptable layout make her ideal for both intimate journeys and stylish events. Built by a renowned name in yacht construction, KIYOMIZU stands as a genuine emblem of Riva's enduring legacy—crafted not just to navigate the seas, but to create lasting memories.

From every angle, KIYOMIZU captivates the eye. Her sleek, low-profile silhouette is accentuated by a gleaming white hull and striking black accents, reflecting Riva's bold yet refined design philosophy. Her elegant lines, large windows, and sculpted superstructure strike a perfect balance between sporty dynamism and classic elegance.

Upon entering, you're bathed in natural light. The salon, surrounded by floor-to-ceiling glass, merges the interior with the sea, creating a luminous, open ambiance that evolves throughout the day. The layout is designed for both relaxation and entertaining—featuring a spacious lounge area aft, a formal dining area amidships, and seamless access to the aft deck through sliding glass doors.

Unusual for her size, KIYOMIZU features a full-beam master suite on the main deck, offering panoramic views, a private en-suite with a walk-in shower, and a walk-in wardrobe. Below deck, the guest accommodations include:

A full-beam VIP suite with a full-sized bed and en-suite

A forward VIP stateroom with a full-sized bed and en-suite

A convertible twin cabin to port, perfect for guests or children

All guest cabins include en-suite bathrooms and share the same refined styling and generous headroom found throughout the yacht.

Powered by twin MTU 12V 2000 M96L engines, KIYOMIZU cruises effortlessly at

21 knots and can reach speeds up to 26 knots. Stabilizers ensure comfort both at anchor and underway, while her planing hull delivers the agility and responsiveness Riva is known for. Whether island-hopping or covering longer distances, she offers exhilarating performance without compromising on comfort.

KIYOMIZU has been carefully maintained and enhanced by a devoted Owner and captain.

## Key features

---

This yacht boasts a remarkable selection of features crafted to elevate your cruising experience. The Zero Speed fins stabilizer guarantees a smooth ride, even while at anchor, and the two Gyro SeaKeeper units add further stability. The Seafary Versatile watermaker ensures a continuous supply of fresh water, while the premium sound system offers outstanding audio quality both indoors and outdoors. Underwater lights set a mesmerizing mood, and the SAT TV KVH system keeps you connected throughout your journey.

For enhanced maneuverability, the yacht is equipped with both bow and stern thrusters and includes a US premium accessory package. The starboard aft helm station provides easy control, and the high/low dining tables on the aft deck and bow, along with two sofas, offer flexible dining arrangements. A Williams Jet Tender is included for effortless exploration of nearby waters.

The yacht is fitted with manual awnings supported by carbon fiber poles throughout, and soundproofing in the fins area ensures a tranquil environment. The premium A/V package in the salon and master cabin delivers top-tier entertainment options. Electric black-out blinds in the cabins (excluding the crew area and bathrooms) and electric curtains on the main and lower decks (excluding specific areas) offer privacy and comfort. Additionally, a wine cellar is available for your collection, making this yacht an exceptionally luxurious choice for discerning buyers.

## Short description

---

The 2020 Riva Argo KIYOMIZU is an extraordinary fusion of heritage, power, and elegant design. Her striking exterior, filled with sunlight and a versatile

layout, makes her ideal for both private voyages and chic gatherings. Built by one of the most respected names in yachting, Kiyomizu stands as a true testament to Riva's lasting legacy—crafted not just to sail, but to leave a lasting impression.

From every perspective, Kiyomizu captures attention. Her sleek, low-profile silhouette is accentuated by a radiant white hull and bold black details, reflecting Riva's daring yet sophisticated design ethos. Her graceful lines, expansive windows, and sculpted superstructure strike a harmonious balance between sporty vigor and timeless grace.

Upon entering, you're enveloped in natural light. The salon, encased in floor-to-ceiling glass, blurs the line between interior and ocean, creating a bright, open atmosphere that evolves with the day. The layout is designed for both relaxation and entertaining, featuring a generous lounge area aft, a formal dining space amidships, and seamless access to the aft deck through sliding glass doors.

Unusual for her size, Kiyomizu features a full-beam master suite on the main deck, offering panoramic views, a private en-suite with a walk-in shower, and a walk-in wardrobe. Below deck, the guest accommodations include a full-beam VIP suite with a full-sized bed and en-suite, a forward VIP stateroom with a full-sized bed and en-suite, and a twin cabin to port that can convert to a full, ideal for guests or children. All guest cabins include en-suite bathrooms and share the same refined styling and generous headroom found throughout the yacht.

Powered by twin MTU 12V 2000 M96L engines, Kiyomizu glides effortlessly at 21 knots and can reach speeds up to 26 knots. Stabilizers ensure comfort both at anchor and underway, while her planing hull delivers the agility and responsiveness Riva is known for. Whether island-hopping or covering longer distances, she offers exhilarating performance without compromising on comfort.

KIYOMIZU has been carefully maintained and enhanced by a devoted owner and captain.

## Upgrades

---

This yacht has undergone a series of remarkable enhancements to enrich your onboard experience. The Starlink Maritime and Starlink RV systems guarantee uninterrupted connectivity, while the Creston control system provides integrated management of audio, video, lighting, and climate across various zones. Security is a top priority with the Ghost Security System, and an enterprise-grade Wi-Fi network ensures constant connectivity. Real-time view cameras with 24/7 recording offer peace of mind, and a weather station installation keeps you updated on changing conditions.

The entire system is backed by a battery backup, ensuring continuous operation. Comfort is elevated with a custom stainless steel sofa frame secured to the deck, featuring premium upholstery. For diving enthusiasts, a dive compressor and four tanks are installed in the garage. A coffee and tea station is set up for your convenience, and power sockets have been added in the wheelhouse for enhanced functionality.

The SIMRAD screens have been upgraded from EVO3 to EVO3S, offering improved navigation capabilities. On the flybridge, a stainless steel Scotsman icemaker and three stainless steel Isotherm fridges ensure refreshments are always available. Custom-made privacy and wind/sun shades for the aft dining area provide comfort and seclusion, while an additional wine cellar near the helm station caters to your entertaining needs. These upgrades make this yacht a truly luxurious and well-equipped vessel.

## Recent services

---

This yacht has recently undergone an extensive range of services to guarantee

peak performance and dependability. On September 9, 2024, the shore power converters were attended to, followed by the application of bottom paint and Propspeed on the running gear on September 11, 2024. The Miele washer and dryer were serviced on September 10, 2024, and the stabilizer heat exchanger was rebuilt on September 16, 2024, with additional work on the stabilizer fins on September 17, 2024. The generators received maintenance at 350 hours on October 1, 2024, and the watermaker was also serviced that day. The A/C units were divided between the engine room and control room on October 15, 2024, and the water maker block was replaced on November 6, 2024.

In early 2025, the Williams Tender was serviced on January 27, and the Sea Keeper was attended to on January 29. The engine battery charger was replaced on February 3, 2025, and the generators received another round of maintenance on March 27, 2025. The bottom paint was refreshed and zincs were replaced on June 5, 2025. The swim platform and stern passarelle were serviced on June 24, 2025, along with a descale of the A/C chillers. The galley extraction fan was replaced on April 23, 2025, and step lights on the main deck were updated on April 3, 2025. A ceramic coating was applied on September 17, 2024, and the insulation for the A/C chillers' pipes was replaced on June 14, 2025, along with ventilation and drain hoses.

The yacht's teak was completely refinished on June 25, 2025. On July 25, 2025, the heat exchanger for the starboard generator was replaced, the fuel tank was cleaned, and the fuel sensors were inspected and cleaned. Additionally, through hull valves were replaced on the generators, hydraulic systems, water maker, and A/C units. These thorough services ensure the yacht is in top condition, ready for any journey.

## Full beam master cabin on deck

---

The full beam master cabin on the main deck is a haven of opulence and relaxation. It boasts a full bed with a mattress, pillows, bedspread, and pillow

covers, all complemented by a storage bed with a handy lifting mechanism. Underneath the bed, there are drawers for extra storage. The bed frame is tastefully upholstered in sole leather with polished stainless steel accents, adding a layer of sophistication. The floor is carpeted with padding beneath for added comfort, and the cabin is decorated with 40 x 40 cm cushions.

For convenience, the cabin is equipped with an electric outlet and a fire extinguisher, ensuring both safety and practicality. A high-quality sound system offers entertainment, while the lacquered ceiling and nightstands with sole leather and glass tops enhance the room's elegance. The forward starboard side is fitted with lacquered storage furniture featuring leather-covered doors and drawers, providing ample space for personal belongings.

The cabin is lit by LED spotlights and an LED panel, creating a cozy and welcoming ambiance. A 48-inch LED TV with an upgraded audio and video system delivers excellent entertainment. The wardrobe includes a mirror, and the porthole housing is fitted with both a curtain and a blackout curtain for privacy. Two reading lights offer focused lighting, and a safe is available for securing valuables.

The sole leather headboard adds a touch of luxury, while the vanity unit with a lacquered top and leather jewel case inside provides a stylish area for personal grooming. Additional storage is offered by a unit with a leather-covered door, and the wooden bulkheads feature a mirror area for added functionality. A custom vanity chair completes the master cabin, making it an ideal retreat on the yacht.

## Master bathroom

---

The master bathroom combines practicality with elegance, featuring a selection of premium accessories. It includes essential items like a holder for the toilet brush, a soap dispenser, a glass holder, and hangers for bathrobes.

The black water tank level indicator is seamlessly integrated into the toilet's control panel, offering both convenience and efficiency. An electric exhaust fan and an electric outlet are installed to enhance comfort and usability.

The bathroom is equipped with an electric toilet and bidet made from ceramic, adding a contemporary flair. The lacquered bulkheads and ceiling provide a refined finish, complemented by LED spotlights and an LED panel that beautifully illuminate the room. A mirror enhances the sense of space, while the porthole housing allows natural light to enter.

The shower unit is crafted with Corian and lacquered walls, featuring a glass door and a stainless steel frame for a modern look. A small cabinet with a glossy lacquered door is conveniently placed on the shower side, while another cabinet with a mirrored door is located on the port side. Beneath the wash basin, a wooden unit provides open space and a door for storage, ensuring the master bathroom is as functional as it is luxurious.

## Full beam VIP cabin lower deck

---

The full beam VIP cabin on the lower deck is a sanctuary of opulence and relaxation, crafted to deliver an outstanding experience for guests. It includes a full bed with a mattress, pillows, bedspread, and pillow covers, all complemented by a storage bed with a practical lifting mechanism. The bed frame is tastefully upholstered in sole leather with polished stainless steel accents, adding a layer of elegance to the space. The floor is carpeted with padding beneath, providing a soft and cozy feel underfoot, and the cabin is decorated with two 40 x 40 cm cushions.

For added convenience, the cabin features drawers under the bed, an electric outlet, and a fire extinguisher, ensuring both practicality and safety. The lacquered ceiling and nightstands, with doors in sole leather and glass tops, enhance the room's sophisticated aesthetic. The lacquered TV furniture, complete with a stainless steel frame and mirrors, houses a 41-inch LED TV

with an upgraded audio and video system, offering excellent entertainment. A mini Hi-Fi system with CD/DVD and Bluetooth capabilities further enriches the entertainment options.

The cabin is lit by LED spotlights and an LED panel, creating a warm and welcoming ambiance. A porthole with a curtain and blackout curtain allows natural light to enter while ensuring privacy. Two reading lights offer focused lighting for nighttime reading. This VIP cabin is meticulously designed to provide guests with a luxurious and comfortable retreat on the yacht.

## Port cabin lower deck

---

The port cabin on the lower deck is crafted with adaptability and comfort in mind, featuring twin beds that can seamlessly slide together to create a full bed. Each bed is equipped with a mattress, pillows, bedspread, and pillow covers, along with practical storage solutions. The bed frames are upholstered in sole leather and highlighted with polished stainless steel accents, adding a touch of sophistication to the room. The floor is carpeted with padding underneath, ensuring a soft and cozy feel, and the cabin is complemented by two 40 x 40 cm cushions.

For added convenience, the cabin includes drawers under the bed, an electric outlet, and a fire extinguisher, ensuring both practicality and safety. The lacquered ceiling and nightstands, with doors in sole leather and glass tops, enhance the room's refined aesthetic. The lacquered TV furniture, complete with a stainless steel frame and mirrors, houses a 41-inch LED TV with an upgraded audio and video system, providing excellent entertainment. A mini Hi-Fi system with CD/DVD and Bluetooth capabilities further enriches the entertainment options.

The cabin is lit by LED spotlights and an LED panel, creating a warm and welcoming ambiance. A porthole with a curtain and blackout curtain allows natural light to enter while ensuring privacy. Two reading lights offer focused

lighting for nighttime reading. This port cabin is meticulously designed to provide guests with a luxurious and comfortable retreat on the yacht.

## Port cabin bathroom

---

The port cabin bathroom is an elegant fusion of cutting-edge technology and refined design. It includes a black water tank level indicator seamlessly integrated into the toilet's control panel, ensuring both convenience and efficiency. The floor is made from Corian, offering a sleek and resilient surface, while the Corian sink with a mixer tap adds a modern touch. The bathroom is fitted with an electric ceramic toilet and bidet, providing advanced functionality.

An electric exhaust fan and an electric outlet are installed to enhance comfort and practicality. The bathroom's aesthetic is elevated by glossy lacquered small cabinets, lacquered bulkheads, and a lacquered ceiling, creating a polished and sophisticated appearance. LED spotlights and an LED panel illuminate the space, while a mirror adds depth and utility.

The shower unit is crafted with lacquered walls and a ceiling, featuring a glass door and a stainless steel frame, delivering a luxurious showering experience. A wooden unit beneath the wash basin offers additional storage, ensuring that the port cabin bathroom is as functional as it is stylish.

## Forward VIP cabin lower deck

---

The forward VIP cabin on the lower deck is a lavish and adaptable area crafted to deliver maximum comfort for guests. It includes a full bed that can be transformed into twin beds, complete with a mattress, pillows, bedspread, and pillow covers. The bed also features a storage system with a lifting mechanism for added convenience. The bed frame is upholstered in sole leather and highlighted with polished stainless steel accents, adding a touch of

sophistication to the room.

Entertainment is provided by a 41-inch Samsung TV with an upgraded audio and video system, ensuring a premium viewing experience. The cabin's floor is carpeted with padding underneath, offering a soft and cozy feel, and is complemented by two 40 x 40 cm cushions. Additional features include drawers under the bed, an electric outlet, and a fire extinguisher for safety.

The cabin's aesthetic is enhanced by a lacquered ceiling and two lacquered nightstands with doors in sole leather and glass tops. LED spotlights and an LED panel illuminate the space, while a mini Hi-Fi system with CD/DVD and Bluetooth capabilities offers a variety of entertainment options. A mirror is conveniently located in the wardrobe, which also features courtesy lights for added convenience.

Natural light filters through the porthole housing, equipped with both a curtain and a blackout curtain for privacy. Two reading lights provide focused illumination for nighttime reading. The cabin is further enriched by wooden bulkheads with mirror inserts and wooden furniture, creating a warm and inviting atmosphere. This forward VIP cabin is meticulously designed to offer guests a luxurious and comfortable retreat on the yacht.

## Cockpit

---

The cockpit of this yacht exemplifies exceptional design and practicality, providing a luxurious and adaptable area for both relaxation and entertainment. It includes two cockpit sofas with an electric sliding mechanism, upholstered cushions, and handy storage drawers. The dining table features an automatic lift system, allowing for effortless adjustment to fit any occasion. Safety is paramount, with a fire extinguisher for the garage accessible from the cockpit via a fire port. The floor is constructed from fiberglass with a teak overlay, offering both resilience and a timeless look. The aft guardrail, crafted

from glass and stainless steel, enhances both elegance and security.

The cockpit is lit by LED spotlights, creating a cozy and welcoming ambiance. A removable upholstered cushion for the table adds extra comfort, while the stern gates, made of glass and stainless steel with a manual locking system, ensure both safety and style. The area is completed with covers for the stern sofas and table, shielding them from the elements.

For entertainment, watertight speakers are linked to the lounge stereo, delivering excellent sound quality throughout the space. This cockpit is carefully crafted to provide an ideal mix of luxury, safety, and functionality, making it a perfect place to enjoy life on the water.

## Flybridge

---

The flybridge of this yacht exemplifies luxury and practicality, providing an outstanding area for both relaxation and navigation. It includes a custom stainless steel sofa frame securely bolted to the deck, featuring premium upholstery that offers both durability and comfort. An additional outlet ensures convenience for all electronic devices. The space is furnished with a custom free-standing leather sofa and a coffee table, creating an ideal setting for social gatherings.

In the flybridge bar area, custom stools add elegance, while an ice maker and three fridges ensure refreshments are always available. The adjustable searchlight, controlled from the helm station and upper bridge, enhances visibility, and the automatic pilot with rudder angle indicator is integrated with the plotter/GPS for precise navigation. Communication is facilitated by a Class D VHF radio telephone with DSC and a separate antenna, along with a color LCD plotter/GPS.

The flybridge is equipped with a control station cover and a cover for the bar side cabinet, protecting the equipment from the elements. Engine and inverter

electronic controls, along with the E-Steer electro-hydraulic steering system, ensure smooth operation. The fiberglass floor laid in teak and the varnished hard top enhance the aesthetic appeal, while a fire extinguisher and GPS antenna provide safety and functionality.

Additional features include a horn, LED spotlights, pilot and guest seats with covers, a radar antenna, and running and anchor lights. A second fiberglass varnished control station with an up-down system for the forward display, upholstered steering wheel, instrumentation, compass, and alarm lights offers comprehensive control. The cabinet with an electric opening system top is equipped with a sink, 24V refrigerator, storage, and an electric grill, making it a versatile space for dining and entertainment.

The flybridge also includes VHF antennas and watertight loudspeakers connected to the stereo in the lounge, ensuring high-quality sound throughout the area. This flybridge is meticulously crafted to offer a perfect blend of luxury, safety, and functionality, making it an ideal setting for enjoying life on the water.

## Helm station

---

The helm station of this yacht serves as an advanced command center, offering the captain full control and navigation capabilities. It includes an acoustic alarm for water in the bilge, ensuring immediate detection of any potential issues. The automatic pilot, equipped with a rudder angle indicator, is integrated with the plotter/GPS for accurate navigation. A black box system combines radar, plotter, GPS, echo-sounder, and monitoring functions, all displayed on a 16" LCD/LED monitor, enhanced by an AIS system for improved situational awareness.

Communication is supported by a Class D VHF radio telephone with DSC and a separate antenna, while a clock and barometer with a hydro-thermometer provide crucial environmental information. The helm station features an

echo-sounder function and an electric bow thruster control panel with a joystick for easy maneuvering. An electric outlet and engine/inverter electronic controls ensure smooth operation, backed by the E-Steer electro-hydraulic steering system.

Safety features include a fire extinguisher and an interactive digital manual accessible on an iPad. The helm station is elegantly designed with a lacquered ceiling and a leather-covered pilot seat with electric controls, illuminated by LED spotlights. A rudder angle indicator and a staircase access from the main deck with wooden steps, stainless steel details, and a carpeted floor enhance both functionality and style.

The trim stabilizers (interceptors) control panel and a varnished helm station with a leather-covered steering wheel offer complete engine instrumentation. Fuel/reverse gear levers, a compass, and alarms ensure the captain has all necessary information readily available. The wheelhouse staircase access from the main deck, with wooden steps and stainless steel details, completes this well-equipped helm station, making it an essential part of the yacht's navigation and control system.

## Salon

---

The salon of this yacht is a seamless fusion of comfort and sophistication, crafted to offer a luxurious setting for both relaxation and entertainment. It includes a plush armchair and an ottoman, complemented by a custom wool rug that lies on the wooden floor, adding warmth and elegance to the space. The salon is decorated with six 40 x 40 cm cushions, enhancing the cozy atmosphere.

For convenience, an electric outlet is provided, and a high-fidelity sound system delivers outstanding audio quality throughout the area. The lacquered ceiling adds a layer of refinement, while the lacquered TV furniture, featuring a stainless steel frame and mirrors, houses a 49-inch LED TV, providing excellent

entertainment options. The salon is lit by LED spotlights and an LED panel, creating a bright and welcoming ambiance.

Manual fabric curtains for the main entrance door and side windows offer privacy and control over natural light. Storage furniture on the starboard side provides ample space for personal belongings, ensuring the salon remains neat and organized. This salon is meticulously designed to offer guests a luxurious and comfortable retreat, making it an ideal setting for enjoying life on the water.

## Dining area

---

The dining area of this yacht is an elegant and welcoming space, crafted to comfortably seat up to eight guests. At its center is a refined eight-seater table, ideal for hosting meals and gatherings. An electric outlet is conveniently placed to meet all your dining needs, whether it's powering a device or creating ambiance with lighting.

The ceiling is beautifully lacquered, adding a layer of sophistication to the area, while lacquered storage furniture at the bow, adorned with sole leather upholstery panels, offers ample storage for dining essentials. The space is illuminated by LED spotlights and an LED panel, creating a warm and inviting atmosphere.

Manual side fabric curtains provide privacy and control over natural light, enhancing the dining experience. Plexiglass housings are thoughtfully integrated for cutlery and pottery, ensuring everything is organized and easily accessible. The wooden bulkheads add a classic touch, completing the elegant design of the dining area. This space is meticulously crafted to offer a luxurious and comfortable dining experience on the water.

## Galley

---

The galley of this yacht is a contemporary and efficient culinary area, carefully designed to fulfill all your cooking requirements while at sea. It includes a "side by side" refrigerator/freezer, offering generous storage for both fresh and frozen items. An access door leads to the portboard walkway, facilitating easy movement around the yacht. Access to the crew area is provided by a staircase with carpeted steps and wooden edges, ensuring safe and easy navigation.

The galley is fitted with a 90cm induction cooktop, oven, and an extraction hood, along with an additional microwave oven for diverse cooking options. The Corian floor, sink with mixer tap, and worktop offer a sleek and durable surface for meal preparation. A dishwasher is included for effortless cleaning, and an electric outlet ensures all appliances can be operated with ease.

The extractor hood features direct outboard discharge, maintaining a fresh environment, while a fire extinguisher is available for safety. The galley is elegantly designed with a lacquered ceiling, furniture, and wall units, creating a polished and sophisticated appearance. A hinged door connects the galley to the dining area, and lacquered bulkheads enhance the refined aesthetic.

Lighting is provided by LED spotlights and LED strips, ensuring a well-lit workspace. A sliding door separates the galley from the crew stair, offering privacy and functionality. This galley is meticulously crafted to provide a luxurious and practical cooking environment, making it an essential part of the yacht's living space.

## Crew cabin (port side)

---

The crew cabin on the port side is carefully designed to offer both comfort and practicality for crew members. It includes a bunk bed arrangement, complete with mattresses, pillows, and bedspreads, ensuring a restful night's sleep. The bed frames are upholstered, adding an element of comfort and style. The

cabin's floor is carpeted, creating a warm and inviting atmosphere, while the ceiling is covered in fabric, enhancing the overall aesthetic.

For convenience, the cabin is equipped with an electric outlet and a fire extinguisher, ensuring both functionality and safety. An emergency exit is strategically located on the ceiling in the portside bathroom, providing peace of mind. The cabin is illuminated by LED spotlights, creating a bright and welcoming environment. A Mini Hi-Fi system with Bluetooth capabilities offers entertainment options, while a porthole housing with a curtain allows natural light to filter in.

Two reading lights provide focused illumination for nighttime reading, and the cabin is equipped with two sets of sheets and pillowcases for added convenience. A wardrobe provides ample storage space for personal belongings, and the wooden bulkheads and furniture add a classic touch to the cabin's design. This crew cabin is meticulously crafted to ensure a comfortable and efficient living space for the crew on board.

## **Crew bathroom (port side)**

---

The crew bathroom on the port side is a well-equipped area crafted to provide both practicality and comfort for the crew. It includes a black water tank level indicator integrated into the toilet's control panel, ensuring effective monitoring of waste levels. The Corian sink with a mixer tap offers a modern and durable surface for everyday use, while the electric ceramic toilet and bidet provide advanced convenience.

An electric exhaust fan is installed to keep the environment fresh, and an electric outlet is available for added practicality. The floor features teak grating, providing both style and slip resistance. The bathroom's aesthetic is enhanced by a lacquered ceiling and laminated bulkheads, creating a polished and sophisticated appearance.

Illumination is provided by LED spotlights, ensuring a bright and welcoming atmosphere. A mirror adds functionality, while a set of two towels is included for convenience. The shower is equipped with a waterproof curtain, ensuring privacy and ease of use. A wooden unit under the wash basin offers additional storage, making this crew bathroom a practical and comfortable space for the crew on board.

## Crew cabin (starboard side)

---

The crew cabin on the starboard side is crafted to offer a comfortable and practical living area for crew members. It includes a bunk bed arrangement, complete with mattresses, pillows, and bedspreads, ensuring a restful night's sleep. The bed frames are upholstered, adding an element of comfort and style to the cabin. The floor is carpeted, creating a warm and inviting atmosphere, while the ceiling is covered in fabric, enhancing the overall aesthetic.

For convenience, the cabin is equipped with an electric outlet and a fire extinguisher, ensuring both functionality and safety. The space is illuminated by LED spotlights, creating a bright and welcoming environment. A Mini Hi-Fi system with Bluetooth capabilities offers entertainment options, while a mirror adds functionality to the space. The porthole housing with a curtain allows natural light to filter in, providing a pleasant ambiance.

Two reading lights provide focused illumination for nighttime reading, and the cabin is equipped with two sets of sheets and pillowcases for added convenience. A wardrobe provides ample storage space for personal belongings, and the wooden bulkheads and furniture add a classic touch to the cabin's design. This crew cabin is meticulously crafted to ensure a comfortable and efficient living space for the crew on board.

## Crew bathroom (starboard side)

---

The crew bathroom on the starboard side is a thoughtfully designed area that blends practicality with contemporary style. It includes a black water tank level indicator integrated into the toilet's control panel, ensuring efficient monitoring of waste levels. The bathroom features a Corian sink with a mixer tap and a Corian wash basin, offering a sleek and durable surface for everyday use. The electric ceramic toilet and bidet provide advanced convenience and comfort.

An electric exhaust fan is installed to keep the environment fresh, and an electric outlet is available for added practicality. The floor is crafted with teak grating, providing both style and slip resistance. The bathroom's aesthetic is enhanced by a lacquered ceiling and laminated bulkheads, creating a polished and sophisticated appearance.

Illumination is provided by LED spotlights, ensuring a bright and welcoming atmosphere. A mirror adds functionality, while the shower is equipped with a waterproof curtain, ensuring privacy and ease of use. This crew bathroom is meticulously crafted to provide a practical and comfortable space for the crew on board.

## Crew dinette / utility area

---

The crew dinette and utility area is a versatile space crafted to offer both comfort and functionality for the crew. It includes an "L" shaped sofa, providing a cozy seating arrangement for dining or relaxation. The area is equipped with a cabinet that houses a cooking plate, fridge, and sink, ensuring all necessary amenities are at hand for meal preparation and storage.

The floor is carpeted, adding warmth and comfort underfoot, while the ceiling is upholstered in fabric, enhancing the inviting atmosphere. This area also features a dryer and a washing machine, offering convenient laundry facilities

for the crew. An electric exhaust fan is installed to keep the environment fresh, and LED spotlights illuminate the space, creating a bright and welcoming ambiance.

A microwave oven is available for quick meal preparation, and the wooden bulkheads add a touch of classic elegance to the design. This crew dinette and utility area is meticulously crafted to provide a practical and comfortable environment, ensuring the crew has everything they need for a pleasant and efficient experience on board.

## Engine room

---

The engine room of this yacht is a carefully crafted area, designed to ensure peak performance and safety. It offers access to the starboard sidewalkway, allowing for easy movement and maintenance. The room is fitted with an A/C flushing system and two air intakes with mist separators, ensuring effective air circulation and cooling.

Power is provided by an auxiliary electric generator with a capacity of 29kW, operating at 120/240V and 60Hz, along with a main electric generator of the same specifications. For emergencies, there are two changeover valves for pumping water from the bilge, and an electric bilge pump is also installed. The engine room is monitored by two color CCTV cameras, enhancing security and oversight.

Access between the engine room and the engine control room is facilitated by a dedicated door, as well as a door connecting the main deck stairway to the engine control room. The engines are safeguarded by double Racor fuel filters, and the fuel system includes a GRP fuel tank with a capacity of 8700 liters, complete with a fuel tank level indicator.

Ventilation is maintained by two electric fans, and the space is illuminated by LED lighting, ensuring a well-lit environment. The flooring is made of light alloy

with an anti-skid finish, providing safety and durability. Additional features include a fiberglass stair for access, a fire extinguisher, a main electrical panel, and a portable lamp for convenience.

The engine room is soundproofed with a watertight fore bulkhead, minimizing noise and enhancing safety. Water filters are installed for both the engine and generator cooling systems, ensuring efficient operation. This engine room is a testament to the yacht's commitment to quality and reliability, providing a secure and efficient environment for all mechanical operations.

## Garage

---

The garage of this yacht is a well-appointed and practical area crafted to elevate your maritime experiences. It includes an electric winch for the effortless lifting and launching of the tender, ensuring smooth and efficient operations. The electro-hydraulic hatch allows for easy access and secure closure, enhancing the convenience and safety of the garage space.

The flooring is constructed from GRP with a non-slip surface, providing durability and safety underfoot. For diving enthusiasts, the garage is equipped with a dive compressor featuring four automatic air filling nozzles, simplifying preparation for underwater adventures. Additionally, the garage accommodates a Williams Jet tender, offering a versatile and dependable option for excursions and water activities.

This garage is meticulously designed to provide a seamless integration of functionality and convenience, ensuring that all your equipment and activities are well-supported while on the water.

## Propulsion and control

---

The propulsion and control systems of this yacht are crafted to provide outstanding performance and agility. It includes an electro-hydraulic power

steering system, offering precise and responsive handling, which is crucial for smooth navigation. The hydraulic bow thruster, with a power output of 50hp, enhances maneuverability, making docking and tight maneuvers effortless.

The yacht is fitted with a stuffing box featuring a dripless shaft seal, which requires minimal maintenance and ensures dependable operation.

Underwater silenced exhausts contribute to a quieter and more enjoyable cruising experience, reducing noise and disturbance. The V-Drive transmission system is designed to optimize power delivery and efficiency, ensuring a seamless and powerful propulsion experience.

These advanced propulsion and control features are meticulously integrated to provide a superior yachting experience, combining performance, reliability, and ease of operation.

## Stabilization systems

---

The stabilization systems on this yacht are carefully crafted to guarantee a smooth and comfortable journey on the water, no matter the conditions. The yacht is fitted with stabilizer fins that function both while moving and at rest, ensuring stability whether cruising or anchored. These fins are crucial for minimizing roll and enhancing onboard comfort.

In addition to the stabilizer fins, the yacht includes trim stabilizers, also known as interceptors, which further boost stability by adjusting the vessel's trim and reducing pitch and roll. This system is particularly effective in optimizing the yacht's performance and fuel efficiency.

Moreover, the yacht is equipped with two Gyros Seakeeper stabilizers. These advanced gyroscopic stabilizers are celebrated for their ability to significantly diminish roll, ensuring a more enjoyable and stable experience for everyone on board. The integration of these sophisticated stabilization systems underscores the yacht's dedication to providing an exceptional level of comfort

and performance, making every voyage a delight.

## Fire extinguishing systems

---

The fire extinguishing systems on this yacht are crafted with the highest regard for safety and efficiency, providing peace of mind for everyone on board. The yacht is fitted with emergency pull handles for engines and generators, enabling a diesel shutdown in case of fire. This system works automatically alongside the fire protection system, ensuring a swift response to potential dangers.

At the heart of the yacht's fire safety is the FM200 fire extinguishing system situated in the engine room. This advanced system is engineered to automatically shut down the engines if a fire occurs, while also offering a safety override feature for additional control. The FM200 system is celebrated for its ability to quickly suppress fires without leaving any residue, ensuring both safety and minimal disruption.

Furthermore, the yacht is equipped with a smoke detection alarm system, providing early alerts to any potential fire hazards. This comprehensive approach to fire safety underscores the yacht's dedication to safeguarding its passengers and crew, ensuring a secure and worry-free experience on the water.

## Air conditioning systems

---

The air conditioning systems on this yacht are crafted to deliver outstanding comfort and climate regulation, ensuring a pleasant atmosphere for everyone on board. Central to this system is the supertropical air conditioning unit, specifically designed to operate efficiently in the most demanding and humid tropical environments. This sophisticated system guarantees that the yacht's interior stays cool and comfortable, no matter the external conditions, allowing

passengers to enjoy their journey in complete relaxation. The inclusion of such a high-performance air conditioning system underscores the yacht's dedication to luxury and comfort, making every voyage a truly delightful experience.

## Bilge system

---

The bilge system on this yacht is meticulously crafted to ensure effective and dependable water drainage management, preserving the vessel's safety and integrity. Central to this system is an electric pump dedicated to bilge drainage in the engine room, delivering strong and consistent performance. Supporting this are four additional electric pumps strategically positioned to address various drainage needs throughout the yacht.

In case of emergencies, the system features an emergency bilge suction pipe located in the engine room, which functions through the engine cooling pump, providing an extra layer of security. Additionally, a multipurpose electric pump is integrated into the system, capable of handling bilge, grey water, and black water, ensuring comprehensive and adaptable water management.

This advanced bilge system underscores the yacht's dedication to safety and operational efficiency, offering peace of mind for everyone on board.

## Electrical systems

---

The electrical systems on this yacht are carefully crafted to guarantee dependable and efficient power management throughout the vessel. The yacht is fitted with two automatic battery chargers for auxiliary service batteries at 24V, as well as an automatic battery charger for engine batteries at 24V, ensuring all critical systems remain powered. The auxiliary generator is backed by a 12V starting battery with low water loss, enhancing reliability.

A breaker box and Carling Switches rated at 100A for 240V shore supply (two units) are included to effectively manage power distribution. Cathodic

protection with anodes is implemented to prevent corrosion, while a 120V electric outlet provides convenient power access. Ground connections for sea water intake and railings, along with ground fault interrupters at 120V with 6mA sensitivity, ensure safety and protection against electrical faults.

The yacht features a set of auxiliary service batteries at 24V and a set of batteries for engine starting at 24V, both designed for low water loss. Inverters are installed to convert power for specific needs: a 60Hz 120V 25kW inverter for the fridge and a 60Hz 120V 3kW inverter for other services. Two isolation transformers at 25kVA each provide additional safety and efficiency.

Lighting throughout the yacht is powered by a 24V system, ensuring consistent illumination. The main generator is supported by a 12V battery with low water loss, and both manual and electric battery disconnecting switches are available for service and engine batteries. Additionally, manual battery disconnecting switches for generators and a mechanical and instant electric battery parallel switch at the main helm position and cockpit provide flexibility and control over the electrical systems.

These comprehensive electrical systems reflect the yacht's dedication to safety, reliability, and performance, ensuring a seamless and enjoyable experience on the water.

## Sanitary and water systems

---

The sanitary and water systems on this yacht are meticulously crafted to guarantee efficient and dependable management of all water-related needs on board. The yacht includes an automatic electric pump for the black water tank, which can be interchanged with the grey water system, allowing for seamless operation and maintenance. The black water tank holds 535 liters and is equipped with gauges showing 3/4 and full levels, along with a deck connection for easy pumping out.

The grey water discharge system is supported by an automatic electric pump, also interchangeable with the black water tank, ensuring flexibility and efficiency. The yacht features an electric WC system that uses fresh water, providing a clean and hygienic experience. A fresh water pump operating at 60Hz ensures a steady supply of water from the fresh water tank, which has a capacity of 1320 liters.

For air conditioning and sea water systems, the yacht has independent sea water intakes, each with a filter to ensure clean and efficient operation. The sea water fire fighting system is equipped with a chain wash down feature, enhancing safety and functionality. In the galley, a three-way valve offers versatility in water management, while water heaters with a capacity of 50 liters ensure a consistent supply of hot water.

These comprehensive sanitary and water systems reflect the yacht's dedication to comfort, convenience, and safety, ensuring a superior experience for everyone on board.

## Hull, deck, and deckhouse

---

The hull, deck, and deckhouse of this yacht are meticulously crafted with precision and attention to detail, offering both functionality and elegance. Access to the flybridge is provided by a fiberglass stairway with a stainless steel perimeter frame, ensuring both durability and style. The swimming platform is reached via fiberglass steps, featuring a teak-laid floor and courtesy lights for enhanced safety and aesthetics.

At the bow, a sofa with upholstered cushions offers a comfortable seating area, complete with a protective cover. The yacht is equipped with a concealed stainless steel electro-hydraulic gangway and swimming ladder, both seamlessly integrated into the design for smooth functionality. The electric anchor winches, rated at 3000W, are controlled from the helm station, bow, and flybridge, ensuring easy and efficient anchoring.

For stern operations, electric winches for warping and an electro-hydraulic garage hatch are included, along with a fiberglass swimming platform featuring an integrated starboard side stair and teak flooring. Fire-fighting hoses are strategically placed at the bow and stern, enhancing safety measures. Fresh water connections are available aft, with outlets for washing at both the bow and stern, and intakes in chromed brass for both fresh water and fuel.

The hull is protected with an antifouling coating, and a perimeter guardrail provides additional safety. The yacht is equipped with polished stainless steel anchors, each weighing 90Kg, and a galvanized steel chain, ensuring secure mooring. A shower with a hot and cold water mixer tap is conveniently located at the stern.

Additional features include side GRP gates, stainless steel air intake covers, cleats, deck accessories, fairleads, handrails, hawses, and stern mooring area covers, all crafted from stainless steel for durability and a polished finish. The stern cockpit and side walkways are covered with teak, adding a touch of luxury. The stern garage is spacious enough to accommodate one tender and one jet ski, while watertight loudspeakers at the bow are connected to the salon audio system, providing high-quality sound throughout the yacht.

## Hatches and windows

---

The hatches and windows on this yacht are carefully crafted to offer both functionality and elegance, enhancing the overall onboard experience. Access to key areas is facilitated by a series of strategically placed hatches, including one to the anchor chain locker and another to the bow deckhouse locker, both equipped with stainless steel ladders for easy entry. Additionally, there is a hatch to the bow locker, ensuring convenient storage solutions.

The engine room can be accessed via a door from the starboard side walkway

and a hatchway from the cockpit, both featuring stainless steel ladders for safe and easy access. The helm station is equipped with a windshield sun cover, offering protection from the elements.

Interior doors are made from wood with stainless steel handles and thresholds, adding a touch of sophistication to the yacht's interior. The helm station features a lateral port side hopper window, while the flybridge includes a manual door on the port side for access to the bow area. Portholes crafted from stainless steel enhance the yacht's durability and aesthetic appeal.

For seamless movement between spaces, the yacht includes a manual side door from the galley to the external walkway, a sliding manual main entrance saloon door made of stainless steel and tempered monolithic glass, and a stainless steel and tempered glass sliding door for access to the flybridge from the wheelhouse. A starboard side manual sliding door connects the main deck lobby to the external walkway.

The yacht's windows are crafted from monolithic or laminated glass, ensuring strength and clarity, while the windshield in the flybridge area is made from plexiglass, offering lightweight durability. These hatches and windows are meticulously integrated into the yacht's design, providing both practicality and elegance.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
