# OVERVIEW

---

Crafted for those who seek calm seas without relinquishing the thrill of open-water performance, this brand-new 2025, 90-foot luxury motor yacht combines a superyacht presence with a deceptively manageable footprint. Lying in the United States and built entirely in 2025, she marries contemporary naval thinking with enduring elegance, providing an ideal platform for private retreats, sophisticated entertaining, and assured bluewater cruising.

A slender, modern silhouette tops an advanced fiberglass composite hull with matching fiberglass decks—materials chosen for structural strength, acoustic comfort, and long-term, low-maintenance durability. Her motion at sea is measured and quiet, driven by twin MTU inboard diesel engines that deliver refined power, dependable serviceability, and efficient long-range performance; whether easing through coastal passages or opening up toward distant horizons, the yacht responds with smooth, confident authority.

Boarding reveals a luminous interior where light and space are abundant. The main salon is framed by panoramic glazing that forges an unobstructed relationship with sea and sky, while carefully chosen finishes, layered textures, and custom upholstery create a warm, modern atmosphere. Subtle, multi-level lighting provides the right mood from breakfast at dawn to late-night conversation. Forward of the salon, an elegant dining area invites lingering meals, and the adjacent, well-equipped galley is arranged to support effortless hospitality.

Outdoor life is effortless across expansive decks: a hospitable aft terrace suited to alfresco dining, broad side decks that facilitate safe, easy movement, and a generous foredeck that becomes a serene lounge when at anchor. Sightlines are clear and handholds are judiciously placed to enhance both comfort and safety underway.

Below decks the accommodations are refined and adaptable, designed for

extended cruising with family and friends. Seven beautifully finished heads afford exceptional privacy and convenience, ensuring guests enjoy en-suite comfort and swift transitions between activities. Storage is plentiful and intelligently sited, with dedicated lockers for luggage, provisioning, and watersports equipment so decks remain uncluttered and the yacht is always guest-ready.

Beneath the waterline and behind every bulkhead, systems are built for quiet confidence: inboard diesel propulsion for efficiency and ease of maintenance, comprehensive sound attenuation for peaceful passages, and thoughtfully organized machinery spaces to simplify routine servicing. From climate control and entertainment systems to shipboard connectivity, modern conveniences are integrated with an emphasis on intuitive operation and restrained luxury. Fresh from the yard and ready to excite, this 2025 90-foot motor yacht distinguishes itself through contemporary lines, premium materials, and MTU-powered capability—an inspired selection for discerning owners seeking a new standard in comfort, style, and performance.

# DETAILED DESCRIPTION

---

## Layout & accommodations

---

A grand six-stateroom, seven-head layout sets the stage for extended cruising and effortless hospitality, anchored by a full-beam master stateroom and a forward VIP with an island queen. Port and starboard guest staterooms are complemented by an additional port stateroom, while a dedicated aft crew stateroom with a private head ensures professional service and privacy. A convenient day head is positioned by the salon door. Every stateroom enjoys an ensuite head and the same elevated specification: upgraded mattresses, custom headboards, mirror ceilings, frameless glass showers, and premium stone finishes that elevate both comfort and craft.

## Salon & interior

---

An electric salon door ushers you into a refined interior where a large dinette with a custom wood table pairs beautifully with a cocktail table, upgraded sofa, and bespoke bar stools beneath elegant wood crown molding, valences, and lambrequins. Durability meets design with Amtico flooring at the entry and day head, while an additional TV above the dinette and a day head reimagined with a custom vanity, a stone countertop, and a full-height backsplash add everyday practicality. Storage has been thoughtfully elevated with a custom pantry featuring enhanced organization and a reconfigured layout that favors forward storage by replacing the standard hanging locker with drawers. Atmosphere is meticulously tuned via LED lighting with dimmers and refined brushed nickel hardware with satin nickel light trims, while companionway walls are finished in walnut center panels with black Corian accents. Overhead rod storage with integrated lighting is seamlessly installed in the companionway, and the salon day head has been reconfigured to position the day head aft and a forward

wet bar. The dinette table is accented with a black inlay, the pantry is optimized for greater forward capacity, and discreet white tape accent lighting runs under the dinette sofa toe kick, salon sofa toe kick, and entertainment credenza. Practical upgrades include Plano box tackle storage concealed behind the salon sofa, and the central vacuum system has been deleted in the pantry and companionway to maximize usable space.

## Galley & dinette

---

The galley is a true working showpiece with multiple undercounter refrigerator and freezer drawers, a 4-burner surface-mount cooktop paired with a conventional oven, and a stainless steel undermount sink set into stone countertops with eased edges. A full-height stone backsplash is complemented by a mirror backsplash for depth and light, all grounded by durable Amtico flooring. A galley overhang with bar seating invites conversation while dimmer-controlled LED lighting and additional outlets throughout keep the space bright, adaptable, and ready to entertain at a moment's notice.

## Staterooms & heads

---

The full-beam master stateroom is a private sanctuary with a king berth topped by an upgraded Viking Slumber mattress, a custom multi-panel upholstered headboard, a 65" TV, and rich wood crown molding. Power and connectivity abound with additional USB/110V outlets and added 110V outlets with USB/USB-C conveniently positioned above the nightstands. Its ensuite head indulges with a marble shower featuring a tile floor and recessed footrest, a frameless glass shower door, a stone vanity top with a full-height backsplash, a mirror ceiling, and Amtico flooring. VIP and guest staterooms echo the same bespoke sensibility with upgraded mattresses, custom headboards, reading lights, and dimmers on overhead LED lighting. Their

ensuite heads continue the theme with frameless glass shower doors, stone or granite vanities, full-height backsplashes, mirror ceilings, and Amtico floors. The port stateroom has been thoughtfully customized with a lower bunk widened to a full twin width, a resized nightstand and locker to suit the new proportions, and additional reading lights both wall- and deck-mounted. In the starboard stateroom, decorative sconces are set into the headboard panels for intimate ambiance. Crew quarters aft provide a self-sufficient retreat with a private head, a washer/dryer combo, refrigerator/freezer, dedicated storage with upgraded finishes, a microwave convection oven, and additional reading lights to support off-watch comfort.

## **Flybridge / helm**

---

Command comes easily from a climate-controlled helm with electronic single-lever controls, a Release teak helm pod atop a teak helm step, and recessed electronics boxes with flush-mount MFDs. A dual radar mast crowns a custom molded hardtop with a brushed pipe frame and a single perimeter rail, while bridge amenities include a freezer, a refrigerated drink box, a freshwater outlet, a watermaker control panel, dedicated power supplies for electronics, and LED floodlights in the hardtop. The helm layout is tailored with custom chair positioning, a Seakeeper gyro display at the helm, a split flybridge hatch, and a 16" x 16" backing plate pre-installed for a future flybridge table, with a concealed wiring track under the forward lounge for future table lighting. The radar mast is modified to accept a PBT radar pod, and the large oval carbon-fiber radar pod is stiffened and reworked to accept a Viking radar mast; a molded forward wedge on the hardtop readies the FLIR camera. A three-sided EZ2CY enclosure reaches to the end of the helm, guided by a flangeless PVC enclosure track mounted on the bridge cap and underside, and a power-actuated drop-down overhead electronics box brings critical systems within easy reach. Navigation lighting is fully integrated with molded port,

starboard, and stern lights, an OGM LED masthead/anchor light on a sunshade-mounted pole, ten hardtop lights fitted with customer-supplied Shadow Caster fixtures, a Rigid Industries 30" RDS low-profile LED light bar mounted aft in a molded pod, and a molded forward Lumitec Maxilume LED spreader light. Safety and fishability are elevated by a three-sided double aft bridge rail running leg to leg with a lower safety rail welded to it, plus ten polished rod holders welded to the bridge rail. The Trillion Series helm chair package perfects the driving position with a contoured helm chair featuring a scalloped seat bottom and integrated slide hardware, thru-hull corners with dog claws and front-facing cushions, custom Ultraleather upholstery with customer-selected fabrics and welt, Bentley stitching with matching thread, a magnet-fastened cushion set, a stainless steel No-Rock slide assembly (4"), a stainless steel pedestal with a no-bolt design, and a dedicated protective cover. Underfoot, a teak helm footboard with an easy-adjust support ring and Trillion Clear non-skid delivers sure-footed control.

## Cockpit & fishing features

---

Purpose-built for serious angling and open-air living, the cockpit showcases mezzanine seating over a tapestry of teak across the cockpit, mezzanine, covering boards, and coamings. Two full-length fish boxes with dividers pair with a transom livewell with a window and lighting, a crushed ice machine, a refrigerated cockpit step box, and refrigerated port and starboard mezzanine boxes, all supported by bait trays, tackle storage, and wiring and bonding prepared for recessed lights, spreader lights, and teaser reels. Power is at hand with electric reel outlets in 24V and 12V, a fighting chair installation, a DC light integrated into the fighting chair, a power-actuated single Seakeeper hatch, and Shadowcaster accent lighting lacing the cockpit and steps, with additional decorative lighting upgrades throughout; even the faces of the cockpit steps from the cockpit to the aft deck glow with Shadowcaster fixtures.

A Costa cockpit sunshade and a full cockpit cover stand ready when the sun is high. Rupp Bigg Riggs HD 51' outriggers, a Rupp Multi Action hydraulic outrigger system with hydraulic locks, a Rupp HD center rigger with mount, Rupp rollers on the outriggers, a bridge mounted heavy duty spreader bar, four teaser line collars on the outriggers, a pair of teaser line grommets under the hardtop, welded teaser line through fittings with inserts, and Rupp halyard grommets in the cockpit gunwales round out a tournament grade spread, complemented by two electric teaser reels, MIYA EPOCH Super US9 with 24V high speed motors. The fighting chair itself is a Trillion Series marvel on an offset pedestal with a beveled edge deckplate, butterfly brake, and flop over handle; a contoured launcher, centerboard, and footrest with Trillion Clear non skid; screwless strike arms with custom black rope wrap; anodized aluminum tapered footrest legs; a five hole chair mounted launcher (CMT5 2 pattern); Ultraleather upholstered armrests in customer selected fabric; a teak back pad; a solid teak tackle drawer with a teak shroud; and a teak bait tray with Trillion Clear non skid and dual stainless cup holders. A fitted chair cover and provisions for LED lighting beneath the fighting chair (customer supplied lights, pedestal modified) keep it protected and illuminated. The Pitch Bait System features two solid teak pitch bait tubes of 4.5" diameter in a marine grade high gloss finish and two stainless steel pitch tube mounting rings with tapered wedge shims and drain bolts mounted to no bolt rod holder drain fittings. Aft, outdoor living blossoms with aft deck air conditioning, an overhead TV, a custom bar with stools, a wood table on a stainless pedestal, additional lighting and outlets, and a modified seating layout for better flow; the starboard seating module and grill cabinet are deleted in favor of a custom aft facing bar top with two stools, an extra aft deck air conditioning outlet in the port haunch, and a suite of overhang lights tuned for superior illumination, including smaller Shadowcaster overhang lights matching the PBT hardtop lighting and additional outboard overhang lights for enhanced coverage. Bar and seating details impress with two teak "Londoner" barstools in solid teak

construction with arched backs and tapered uprights in a marine grade high gloss finish, upholstered seat cushions with Bentley diamond stitching, and two polished 316 stainless steel pedestals with welded footings on 10" deckplates with decorative trim rings in a hard mounted installation. Two stainless steel table pedestal systems with 4.5" diameter fixed pedestals stand 34.75" tall and include both deckplate and undermount plates. For everyday refinement, full height backsplashes are installed in all heads, and custom aft salon deck bench seating includes upgraded upholstery and a tailored cover.

## Deck & exterior

---

Presence and purpose define the profile with a custom Stars and Stripes gelcoat hull color over Viking Blue bottom paint and a polished stainless steel anchor run through a through stem system with a below deck windlass. Maneuvering and maintenance are simplified by a hydraulic bow thruster, a faux teak toe rail, a sliding fender track, a freshwater anchor washdown, a custom bow rail, and fuel fills to port and starboard feeding an expanded fuel capacity with an additional tank for four total. Shadowcaster rope lighting encircles the bridge brow in a full perimeter glow, a single perimeter hardtop rail integrates with a bridge rail system featuring safety enhancements, and hardtop and mast lighting are fully upgraded for offshore visibility.

## Engine room & mechanical

---

Power comes from twin MTU Series 2000 V16 M96L engines rated at 2635 MHP, supported by two Kohler 40 kW generators and a Seakeeper SK40 gyro for remarkable stability. The Spot Zero watermaker combo unit, a fuel polishing system, and the ElectroSea seawater management system safeguard reliability, while an air compressor and HeadHunter freshwater and head systems keep onboard services robust. Climate and cooling are managed by

dual chillers with a secondary logic control panel, with an additional freshwater washdown pump and backup seawater pumps providing redundant resilience. A Willy Vac bilge system maintains a dry, clean environment, and performance hardware includes flow aligned struts and twisted rudders with Mussel Buster prop and rudder protection. Organization is exceptional with engine room toolboxes, custom shelving, and an AME sonar tube installed for advanced capability.

## Electrical & systems

---

A dependable domestic power system distributes energy to USB and USB-C outlets throughout the vessel, illuminating every space with LED lighting and tempering comfort across multiple climate zones. Safety is ever present with a fire suppression system, while centralized Octoplex monitoring—including a display in the captain's stateroom—keeps vital data visible and control intuitive.

## Recent upgrades & custom features

---

A comprehensive program of enhancements elevates life aboard, from extensive interior décor upgrades and custom lighting throughout the interior and exterior to expanded storage solutions that keep every outing organized. Entertainment and social zones have been enriched for gathering and relaxation, while owner specified finishes and materials give every surface a uniquely personal, impeccably curated feel.

## Electronics & navigation

---

Navigation Displays & Radar: Confidence at the helm comes from a Garmin GMR 2536 xHD3 25 kW radar with a 6' open array, three Garmin GPSMAP 9222

chartplotters with 22" displays at the helm, and two Garmin GPSMAP 8612 TS MFDs—one housed in the power drop down electronics box and one in the teaser reel box on a custom AME mount. Control is seamless via a vertical Garmin Grid 20 remote input, with Garmin Navionics Vision+ coverage from Mexico through the Caribbean to Brazil and preloaded coastal charts on all applicable MFDs. Autopilot, Compass & AIS: A Garmin autopilot installation kit teams with a Garmin MSC 10 satellite compass and a Vesper Cortex M1 Smart AIS transponder for precise steering, heading, and situational awareness. Networking & System Infrastructure: Redundant, high speed integration is delivered by Garmin BlueNet 20 network switches, a BlueNet 30 network gateway, GMS10 expanders, Garmin network cabling throughout, Garmin USB card readers, and an Actisense NGX 1 USB interface, complemented by AVPro SEALOC HDMI extenders at multiple locations, a Tycon PoE Ethernet switch, and a Garmin PoE isolation coupler. VHF: Ship to shore comms are rock solid with two Icom IC M605 VHF radios paired to two 16' Comrod VHF antennas, secured with flush mount brackets and standoffs and amplified by external VHF speakers on the bridge. SATCOM / INTERNET: A Starlink Flat High Performance Maritime antenna keeps you connected offshore, while a Peplink BR1 Mini cellular router (Viking standard) adds versatile coastal bandwidth. Stereo & Audio: Sound is orchestrated by a Fusion Apollo RA770 touchscreen stereo with Apple AirPlay, a Fusion Apollo ERX400 wired cockpit remote, and a Fusion SRX400 zone stereo serving the engine room and companionway, all driven by JL Audio amplifiers. JL Audio M6 marine speakers energize the bridge (forward and aft) and cockpit (steps and haunches), while James Loudspeakers under the gunwales, a Russound Bluetooth transceiver, and a SiriusXM tuner with antenna round out the experience. SAT TV & Media: Entertainment is global with a KVH TracVision UHD7 satellite TV system and DirecTV receivers in the salon and master stateroom, all guest staterooms, and the mezzanine, complemented by Roku Ultra media players throughout, URC Wi-Fi remotes in all staterooms, salon, mezzanine, and crew, and a Cinema Connection Kit in

the salon. Video Cameras: Vigilance is assured by four GOST 1080p wide angle cameras—three in the engine room and one in the salon—managed by a quad video processor. Thermal Imaging: A gyro stabilized, color FLIR M364C thermal camera with a dedicated FLIR JCU control unit extends vision after dark and in reduced visibility. Cockpit & Mezzanine Electronics: On deck, a Garmin GPSMAP 9219 display sits neatly at the cockpit haunch, with USB A and USB C charging ports tucked into mezzanine armrest compartments, dedicated cockpit stereo amplification and speakers, and an interface to the Shadow Caster underwater lighting system. The installation includes twelve customer supplied Shadow Caster underwater lights spanning the transom, port and starboard sides, and downward facing fixtures for a dramatic underwater glow. Engine Room: A dedicated Fusion stereo zone, comprehensive camera coverage, and fully networked monitoring with audio integration keep the heart of the yacht audible, visible, and under control.

## Exclusions

---

The following items do not convey with the sale: the teak steering wheel, the mezzanine table, the fly bridge table, the Mercury 3.5 HP outboard engine, and the paddle board.

# CONTACTS

---

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
