OVERVIEW

SL96 Asymmetric reconceives the familiar yacht layout, a subtle recalibration of onboard equilibrium that reclaims spaces once destined for circulation and, more importantly, invents new modes of life at sea—fresh sightlines and experiences that intensify the natural visual, physical, and emotional bond between people and the water.

A refined synthesis of form, destination, and purpose, she is a beautifully crafted vessel for life. By preserving only the starboard side deck and relocating the port passageway to the superstructure roof—an innovation first seen on the SL102A—the asymmetric concept frees approximately 10 square meters for the interior. Against a conventional arrangement, this plan yields greater volume, increased daylight, and striking adaptability, resulting in a larger, brighter main-deck salon that feels intimately connected to the surroundings.

New and presently under construction for delivery in Summer 2026, the yacht embodies Sanlorenzo's patented asymmetric architecture and offers five ensuite staterooms for up to 11 guests, including a main-deck owner's suite that opens directly onto a private bow terrace. Outdoor life remains unreservedly sea-facing across an expansive flybridge, a foredeck lounge, a welcoming cockpit, and a transom hydraulic bathing platform that transforms the water into a private beach. With flybridge stature and superyacht presence, this planing performance cruiser is conceived for elegant entertaining, blue-water cruising, and the pursuit of unbroken horizons.
