OVERVIEW

Step aboard the 2010 Princess 95 and discover a flybridge motor yacht that marries pedigree with performance and poise. Measuring 96 feet overall on a sleek Deep V fiberglass hull, she combines an elegant silhouette with true bluewater capability, offering a composed, confidence-inspiring ride whether hugging the coast or opening up for longer passages. This planing superyacht reflects the refined luxury and meticulous construction for which Princess is celebrated, presenting an attractive profile and a reassuringly solid feel underfoot.

Beneath her graceful decks, twin MTU 16V 2000 M93 engines, each producing 2,400 hp, supply authentic performance, allowing an effortless 20-knot cruise and the ability to approach 28 knots when called upon. Precision engineering and a thoughtfully developed hull form yield a calm, controlled motion and the direct sensation of performance yachting. Manoeuvrability is enhanced by thrusters at both bow and stern, power-assisted hydraulic steering, dual-station controls and a raft of practical systems that make tight berthing and close-quarters handling straightforward; these same systems are scaled for confident coastal cruising and offshore work.

The interior atmosphere is warm and sophisticated, where a spacious salon framed by panoramic windows flows into a formal dining area and then out to expansive exterior decks, creating an uninterrupted sequence of entertaining and relaxation spaces. A fully equipped galley supports everything from intimate breakfasts to full-scale dinner service, while each interior and alfresco area has been arranged to encourage conversation, repose and an intimate connection with the sea. As a luxury yacht for family cruising, private retreat or high-end entertaining, she projects timeless style and contemporary comfort in equal measure.

Accommodation is provided for 8–10 guests across five stylish staterooms,

including a full beam master suite, an elegant VIP and three beautifully finished guest cabins, all conceived for privacy and tranquillity. Crew quarters comprise three dedicated cabins able to house four to five crew, ensuring discreet, seamless service. The layout includes four en suite guest bathrooms in addition to a convenient day head and comprehensive crew facilities, underlining her suitability as a charter friendly cruising yacht.

On deck, teak laid walkways, cockpit and an expansive flybridge define the outdoor living areas. The flybridge is appointed with a wet bar, grill and broad sunpads for lounging beneath open skies, while a hydraulic swim platform affords effortless access to the water. Practical shore interfaces include opening side doors to both side decks, twin transom gates, a hot and cold transom shower and a telescopic 4.7 meter passerelle with remote. A flybridge crane, 24V stern mooring winches, stern docking lights and a third cockpit docking station add purposeful capability to her polished presentation. Comfort is further enhanced by stabilizers, with zero speed units fitted on many examples to reduce motion both underway and at anchor. Twin hydraulic anchor winches feed twin anchors in support of secure, efficient anchoring. Dual station navigation equipment features color radar and a chartplotter/GPS integrated with autopilot, Navtex, dual station electric trim tabs with indicators, a speed and distance log, an echo sounder with alarm, a remote control searchlight and VHF DSC R/T at both helms, providing a comprehensive bridge suite for safe passage making.

Entertainment and domestic systems satisfy modern superyacht expectations. Full air conditioning serves all interior spaces. The salon houses an LCD TV with DVD/radio and surround sound, and every cabin is fitted with its own LCD TV and DVD/radio system. The galley is equipped with a refrigerator and deep freeze complete with ice maker, twin combination microwave/conventional ovens and a dishwasher, while the saloon benefits from twin refrigerators and a dedicated wine cooler. A laundry center and a

vacuum WC system complete the yacht wide conveniences.

Electrical and support systems are robust, led by twin 40 kW diesel generators, twin shore power inlets and twin 100 amp float battery chargers to ensure reliable power whether at sea or alongside. Side boarding doors to port and starboard, extensive teak decking across side decks, cockpit and flybridge, and carefully engineered helm ergonomics confirm her credentials as a finely crafted, long range cruising platform.

Presented in meticulous condition and ready for immediate enjoyment, this Princess 95 Motor Yacht is a proven performer with enduring good looks. As a flybridge yacht, luxury superyacht and planing motor yacht with bluewater range, she will appeal to discerning owners seeking a refined private sanctuary, an engaging family cruiser or an impressive stage for entertaining at the highest level.
