CONTACTS 39

OVERVIEW

Launched in 2022, the CL Yachts CLX96 REUNION stands as the pinnacle of the CL Yachts X Series, elevating the standard for 90–100 foot flybridge motor yachts by combining rugged, true bluewater capability with a loft-inspired interior and exceptionally spacious entertainment areas not often found in this size range. Measuring 96'9" (29.50m) LOA with a 24' beam, she is driven by twin Caterpillar C32 ACERT diesel engines that yield a 25-knot top speed and a 22-knot cruising pace. Constructed in composite to RINA classification and supported by a 10-year structural hull warranty, REUNION accommodates eight guests in four staterooms plus four crew in two cabins, making her equally at ease hosting relaxed gatherings at anchor or covering long distances on extended superyacht voyages.

DETAILED DESCRIPTION

Optional equipment

Refine and personalize every voyage with a refined selection of optional equipment that elevates performance and onboard comfort. A gyro stabilizer calms the vessel underway, while the optional at-rest fin stabilization ensures tranquil comfort at anchor. Close-quarters handling is effortless thanks to the SIDEPOWER hydraulic stern thruster, and the flybridge foredeck and swim platform are served by a complement of twelve 60mm carbon fibre poles. Safety and tender handling are reinforced by a life raft and chocks, together with dedicated tender chocks on the swim platform fitted with backing plates and both deck and flush tie-down eyes. Interior convenience is enhanced by powered window shades in lieu of manual units and a stacked 24" washer/dryer in the crew lounge. For extended independence at sea, specify a BLUE WATER legend watermaker — choose from the 950/2, 1500/2 or 1850/2 models. Deck operations are simplified by a fold-down davit (800kgs) located beneath the watertight hatch on the port side of the swim deck. Classification and connectivity options include RINA C + HULL•MACH; Y Certificate, KVH Trac Vision UHD7 for Direct TV, and Sirius XM satellite radio.

Construction

The yacht's structure is built from cored fiberglass for the hull, deck and superstructure, with cored fiberglass bulkheads and cabin soles, and incorporates infused bi-axial and multi-axial E-glass and carbon fibre laminates cured in vinylester resin to achieve outstanding strength, stiffness and long-term durability. Integral fiberglass tanks for fuel, fresh water and waste are moulded into the structure and fitted with internal baffles and access manholes for straightforward cleaning and maintenance, while a molded

fiberglass rub rail finished with stainless steel capping protects the sheer. All glazing is laminated tempered glass and is tinted throughout the vessel, with the sole exception of the pilothouse where clear glazing ensures uncompromised visibility. The exterior is presented in a high-gloss ALEXSEAL finish with ALEXSEAL non-skid applied to every exterior deck surface, and is enriched by genuine teak on the aft deck, swim platform, flybridge deck, side decks and foredeck. Deck fittings and hardware are manufactured from 316 stainless steel for superior corrosion resistance, and beneath the waterline the hull bottom is protected by a SEAHAWK epoxy barrier system and finished with two coats of SEAHAWK antifoul bottom paint. The construction quality and standards of the build are certified by a RINA Hull Construction Certificate.

Deck hardware

The anchoring and mooring systems have been specified for both strength and ease of use, with twin hydraulic MAXWELL VWC 4000 windlasses furnished with 1/2" gypsies, rope capstans and chain stoppers, paired with two 80 kg HHP Pool Type anchors and two 250' lengths of 1/2" high-test galvanized chain; windlass operation is available from local controls and from a remote station at the helm. Soft illumination under the side-deck overhangs defines the walkway while polished chrome courtesy lights and dedicated step lights artfully highlight the moulded stairs, and a freshwater anchor washdown provides convenient rinsing after use. Secure mooring is ensured by four stainless steel mooring bollards and six stainless steel fairlead/spring cleats, all protected by robust 1.25" stainless steel rails, with the bow appointed with a stainless steel burgee staff and an additional stainless steel flag staff. Boarding is simplified by port and starboard aft-deck gates and practical features include step plates at deck entrances, scuppers draining to the boot top and foredeck hatches offering storage and access to the chain locker. For sunshade flexibility, 60 mm sockets on both the flybridge and swim platform accept

optional sunshade poles, and stern line handling is further supported by two MAXWELL 85 TDC Vertical capstans with local controls to complete the specification.

Interior finishes

The yacht's interior is appointed in rich Portofino walnut, creating an atmosphere of understated elegance, with painted ceilings throughout except for the lower deck foyer and the champagne lounge ceiling which are finished differently. Guest quarters feature hardwood flooring, while the salon and pilot house are laid in stained teak and holly for a classic marine aesthetic. Specified surfaces are finished in CORIAN drawn from the Solid Series colour selection, and durable quartz tops grace the galley and wet bar. Crew areas are fitted with resilient AMTICO flooring, and both interior and exterior seating are fully upholstered for lasting comfort. The guest heads are clad in sintered stone tiles on both walls and floors. The specification is rounded out by a loose furniture package that includes chairs and a chaise lounge, together with a soft goods package comprising a bed cover, a runner, and a throw pillow.

Electrical systems

The yacht's electrical framework is centrally managed by a CZONE monitoring and alarm system, supervising both 220/110 VAC (50/60 Hz) and 24/12 VDC distribution networks, with the principal switchboards situated in the engine room and secondary sub-panels thoughtfully located throughout the vessel. Night-time operations are refined by an ACR 100 searchlight with dual-station remote control, LED navigation lighting and pervasive LED illumination across interior and exterior spaces, including dimmable cabinet and step lights in key areas and automatic wardrobe lighting. Emergency luminaires engage automatically on failure of the primary lighting system and are backed by a

dedicated DC power source, while GFI-protected AC receptacles are provided in the galley, heads and exterior zones for safety and convenience.

Redundancy and capacity are engineered into the battery and charging architecture, beginning with two 24 VDC 8D battery banks allocated for engine starting and ship service, two 24 VDC 4D banks reserved for generator starting, and an additional 24 VDC 4D bank dedicated to electronics paired with a 60 A 12 VDC VANNER power supply for 12 VDC systems. Charging is handled by a 24 VDC 60 A charger, a 24 VDC 95 A charger and a 24 VDC 45 A charger, with operational flexibility enhanced by a battery parallel system located at the helm. Shore power is managed through two GLENDINNING Cablemaster shore power cable retrieval systems (230 VAC, 100 A) supplied with two 100 ft. cables and protected by two 100 A isolation transformers with a paralleling controller, complemented by generator/shore power selector switches and a shore power polarity indicator. Comprehensive protection and grounding include a copper bonding network connecting all through-hull fittings and major metal structures to zinc anodes, a Dynaplate grounding plate and strap supplying the pilothouse and flybridge ground terminal boards, and dedicated voltmeters and ammeters to monitor supply circuits. For a striking nocturnal silhouette, six underwater lights complete the specification.

Engine room & machinery

At the core of this yacht reside a pair of CATERPILLAR C32 ACERT diesel engines, each rated at 1,900 bhp, cooled by fresh water and fitted with 24 V DC starting; both are coupled to ZF3050A reverse/reduction gearboxes and remain under full engine warranty through January 25, 2028. Conveniently positioned local start/stop instrument panels for the mains and generators place control at the operator's fingertips, while underwater exhausts with bypasses and fiberglass mufflers ensure quiet, refined operation. Engine-room ventilation is managed by a DELTA T system using air/water demisters to

sustain optimum airflow and a dry, well-ordered machinery space.

Electrical generation is provided by twin KOHLER units, rated 45/53 kW, each installed in sound-attenuating guards and coordinated by a Decision-Maker 3500 paralleling controller for automatic start, stop, parallel operation and load sharing. Guest and crew comfort is sustained by 220 V AC reverse-cycle chilled water air conditioning throughout (except the engine room), and generator discharge is silenced by CENTEK combo mufflers of the air/water separator type with hull-side exhaust. Fire safety is delivered via an FM200 system with both manual and automatic actuation; upon discharge audible and visual alarms activate and the system isolates machinery by shutting down engines, generators, fuel lift and transfer pumps and blowers while closing hull-side ventilation dampers.

Maneuvering and sea-keeping are assured by a SIDEPOWER hydraulic bow thruster, a SIDEPOWER underway fin stabilizer system, and an OPTIMUS power steering package. Maintenance and serviceability are enhanced by a REVERSO lube oil change system with a dedicated manifold and hose runs to every engine and gearbox, complemented by RACOR filtration for the mains and generators. Hot water and domestic systems include two 28-gallon water heaters tied into a hot-water ring with circulating pump for instant delivery, a HEADHUNTER Mach 5 water pump with accumulator tank for steady fresh-water pressure, and a whole-boat sediment and charcoal water filtration unit, plus a dedicated sink with fresh-water hose bib.

Safety and operational management extend to automatic bilge pumps with electronic level detectors in each compartment, a comprehensive fuel-management arrangement featuring fuel shut-off valves and a metered fuel-transfer pump, and full monitoring for fuel, fresh water, black water and grey water tanks. The black-water holding tank is equipped with a macerator pump enabling direct overboard discharge where permitted or connection to a vented deck fitting for shore-side pump-out. The vessel has been prepared for

an ECOMAR sewage/grey water treatment installation and for a watermaker, with mounts, plumbing and electrical provisions already in place.

The engine-room outfitting includes GROCO bronze raw water strainers for all engine and seawater pump intakes, seacocks on every below-waterline through-hull fitting, fiberglass battery boxes, battery voltmeters, and extensive noise and vibration attenuation measures. The running gear is built to exacting standards with AQUALOY 22 (or equivalent) propeller shafts, stainless steel rudder blades, Nibral propeller shaft struts and dynamically balanced five blade class S Nibral propellers. Long-wearing interfaces are provided by VESCONITE Hilube shaft bushings, TIDES MARINE rudder bushings and TIDES MARINE shaft seals. Engine-room lighting, detection and convenience are handled by AQUA SIGNAL LED overhead lights, a smoke detector, a heat detector and AC GFI outlets, while access and escape are secured by a watertight entrance door from the crew area and a watertight emergency escape hatch from the engine room into the VIP stateroom.

Pilothouse/flybridge

Command at sea is delivered with effortless refinement from a helm appointed for absolute control: SEASTAR Optimus electro-hydraulic power steering works in concert with MATHERS MC2000-2 electronic engine controls and three 22-inch multi-function displays housed in a dedicated instrument and electronics console that includes full engine instrumentation and alarm systems. Navigation and situational awareness are enhanced by a RITCHIE five-inch compass complete with light, dimmer and protective cover, while a bespoke stainless-steel steering wheel and two STIDD helmsman's seats with vinyl covers provide an exalted seating position. The CZONE monitoring system (see Electrical Systems) is integrated for comprehensive systems oversight, and convenience is assured with both AC and USB power outlets. The pilothouse also features a remote for the anchor windlass, windshield wipers with a

freshwater wash function, overhead lighting with dimmer control and red night lighting with separate dimmer, a windshield defroster, and ZF remote engine control plug-in points located one forward and one aft.

The flybridge is conceived as a social sanctuary where stainless-steel rails embrace a warm teak deck. On the starboard side a molded fiberglass L-shaped lounge, upholstered for comfort, surrounds an oiled teak tabletop mounted on stainless-steel pedestals; cup holders and pop-up mood lights on the forward Portuguese terrace to port and starboard add ambiance. A fully equipped wet bar with CORIAN countertop and sink with cold-water faucet, a U-LINE refrigerator and an ice maker ensure refreshments are always at hand, while an upholstered settee and a pop-up cabinet prepared for a fifty-inch television lift the entertainment experience. To port, a painted fiberglass storage cabinet topped with a CORIAN counter conceals an upholstered settee, and three bar stools face the action. Provision has been made for flexible shade with sockets for awning posts and a fabric sunroof over the aft overhang, and a stereo system with mounted speakers provides the soundtrack for every moment.

Access and safety are executed with equal care: a stainless-steel and acrylic hatch and a stainless-steel staircase with teak treads lead to the aft deck, secured by stainless-steel rails and a gate, while scuppers and a dedicated drainage system route water to the lower deck. Protection systems include a lightning arrester, a combined smoke and CO detector, and courtesy lights at deck level. Practical service fittings include a fresh water washdown hose bib located inside a storage cabinet, a painted fiberglass cabinet with provision for a gas BBQ beneath the CORIAN countertop and an AC GFI outlet. For extended visibility, an ACR 100 quartz halogen searchlight with remote dual-station control and a twin-trumpet air horn are installed. The pilothouse is elegantly enclosed by fixed adhesion-type tinted tempered/laminated glass windows set within recessed window boxes fitted with manual blinds, complemented by a stainless-steel framed tempered-glass hinged door and up/down electric

windows on the aft bulkhead and both pilothouse sides, while an internal staircase provides a seamless connection to the main salon—where form, function and impeccable craftsmanship converge.

Salon/dining room

The salon and dining room are bordered by fixed adhesion-type tinted laminated tempered glass windows that fill the interior with natural daylight, while recessed window boxes fitted with manual window blinds offer discreet privacy and effective glare control. Ambience is refined by ceiling lights with dimmer control and a dedicated switch, complemented by valance and floor lighting operated by a switch. Entertainment is immediate thanks to a fold-down 65-inch TV with integrated stereo and speakers, supported by an HDMI socket for seamless connectivity. Comfort and conviviality are ensured by an upholstered settee, an extendable dining table, a dining buffet unit and three bar stools, with storage cabinets on the port and starboard house sides that incorporate two wireless phone chargers for convenient power. Everyday practicality is provided by AC outlets and USB power outlets throughout. Flow to the exterior is effortless through an electric stainless steel-framed, tempered glass sliding door to the aft deck and a stainless steel-framed, tempered glass folding door to the starboard side deck, while safety is addressed by a combined smoke and CO detector.

Day head

The day head is finished with a CORIAN countertop and coordinating backsplash that frame a contemporary vessel sink, complemented by a hot and cold faucet and a discreet storage cabinet below. A TECMA electric head with fresh water flush provides efficient, hygienic operation, while an exhaust blower promotes rapid air exchange. Overhead lighting, operated from its own

switch, illuminates the space and a lighted vanity mirror lends refinement to daily routines. An AC GFI outlet completes the arrangement, providing power for grooming appliances and other necessities.

Galley & dinette

The gourmet galley is appointed with a suite of Bosch appliances that read like a chef's checklist: a 27-inch oven, a 27-inch built-in microwave with hood, a 27-inch cooktop and a 24-inch dishwasher. Cold storage is generous and purpose-built, anchored by a Sub-Zero 42-inch standing refrigerator/freezer paired with a Sub-Zero 24-inch drawer freezer, while an undercounter U-Line ice maker and a dedicated wine cooler stand ready for effortless service. A Fenix-clad galley island and matching upper and lower Fenix cabinetry, with drawers beneath a quartz countertop, deliver resilient, fingerprint-resistant work surfaces and plentiful storage, complemented by a stainless steel double sink and a hot and cold faucet with a removable spray handle. Practicality meets refinement in the provisions for waste and cleanup with a trash compactor and garbage disposal, and lighting is layered for both function and mood with overhead lights featuring dimmer control, under-cabinet illumination and recessed window boxes fitted with manual blinds to modulate daylight and privacy. Modern conveniences and safety are comprehensively addressed with USB power outlets, AC GFI outlets, a combined smoke/CO detector and a conveniently located electrical subpanel.

Across from the galley the social center unfurls into an elegant bar topped with a Corian bar top, equipped with a slide-out bottle rack and a wine glass cabinet positioned above the wine cooler for immediate presentation. The Champagne lounge encourages long conversations and slow evenings, appointed with a U-Line champagne cooler, dedicated glass storage, an oiled teak ceiling above and soft carpet underfoot, while three-panel electric blinds at the front windscreen allow the atmosphere to be changed at the touch of a button.

Comfort and connectivity are assured by an upholstered settee, a wireless phone charger and a stereo with speakers, and circulation through the yacht is intelligently arranged with a wood staircase leading to the lower deck and a second wood staircase rising to the helm station and skylounge.

Master stateroom

A refined retreat centered on a king berth with built-in storage drawers beneath, edged by a soft carpeted perimeter that cushions every step, the master stateroom is bathed in natural light from fixed hull-side windows and an overhead skylight fitted with an electric blind; a recessed window box with a manual shade provides instant privacy when desired. The layout is meticulously appointed with two night tables and a dedicated recess for a 65-inch TV and sound bar, with a storage cabinet below and wall lights flanking the bed to create atmosphere. Safety and peace of mind are addressed with a combined smoke/CO detector and a discreet small safe, while wardrobe requirements are fulfilled by a walk-in closet whose back surfaces are cedar lined and whose door carries a full mirror, complemented by ample storage cabinets. Daily rituals are elevated by an upholstered settee and a vanity with mirror, and lighting is precisely controlled via ceiling fixtures with dimmer and on/off switch, valance lighting, floor lights with switch, and two individually switched reading lights. Modern connectivity and convenience come from multiple USB and AC outlets plus an HDMI socket, and an Isotherm refrigerator in the master stateroom foyer keeps beverages and refreshments readily at hand.

Master head

The master head is softly lit by ceiling lights controlled from a convenient switch, creating an atmosphere of discreet luxury without sacrificing

practicality. A smart glass partition separates the his and her areas, which are appointed with two TECMA electric heads with fresh water flush set against sintered stone walls and floor. A generous stall shower continues the cohesive design with a smart glass enclosure, hinged door, and matching sintered stone walls and floor. His and her CORIAN vanity tops with wash basins are complemented by premium faucets and bath accessories, while illuminated mirrors above and medicine cabinets below provide organized, elegant storage. Practical amenities include exhaust blowers and AC GFI outlets, and an emergency escape from the shower to the foredeck via a watertight hatch ensures safety. Natural light filters through fixed hull side windows, and a recessed window box with a manual shade allows for tailored privacy and ambiance.

VIP stateroom

A refined queen-sized island berth, fitted with storage drawers beneath, forms the centerpiece of the VIP stateroom, accompanied on either side by twin nightstands and complemented by a vanity with mirror and an upholstered settee. Ample storage is provided by a dedicated storage cabinet and a wardrobe whose back surface is cedar lined and whose door is fitted with a mirror. Lighting has been carefully layered to create atmosphere and practicality, with ceiling lights operated by a switch, valance and floor lights on a switch, and two individually switched reading lights. Natural illumination is welcomed through fixed hull-side windows and a recessed window box equipped with manual shades. Entertainment and connectivity are discreetly integrated within a dedicated recess for a 55" TV with sound bar, flanked by wall lights, and supported by USB power outlets, an HDMI socket, and AC outlets. Safety is addressed with a combined smoke and carbon monoxide detector, and a virtual skylight above imparts a bright, contemporary sense of space.

VIP head

The VIP head is exquisitely appointed, with overhead ceiling lights controlled by a dedicated switch, and includes a stall shower enclosed by a glass door with sintered stone on the walls and floor. A lighted mirror above the wash basins complements a medicine cabinet located under the basins, while a CORIAN vanity top with wash basin is paired with refined faucets and coordinating bath accessories to elevate the finish. Practical systems include exhaust blowers and a TECMA electric head (fresh water flush) housed in its own head compartment, which likewise features a glass door and sintered stone walls and floor. Natural light filters through fixed hull side windows and is tempered by a recessed window box with a manual shade, and everyday convenience is assured with an AC GFI outlet and a counterbalanced door, all grounded by the durability and elegance of a sintered stone floor.

Port guest stateroom

Arranged to offer guests refined, adaptable accommodation, the port guest stateroom boasts twin berths that convert as needed, each with storage drawers beneath and separated by an elegant carpet runner, accompanied by a night stand. Safety and ambiance are addressed with a combined smoke and CO detector, overhead ceiling lights controlled by a dedicated switch, separate valance and floor lighting on their own circuit, and two individually switched reading lights. Daylight is admitted through a fixed hull-side window set into a recessed window box, complete with a manual shade for privacy. Ample storage is provided by a wardrobe whose back surface is cedar-lined and which is fitted with a mirrored door. Entertainment and connectivity are comprehensive, featuring a 24-inch TV with sound bar, USB power outlets, an HDMI socket and AC outlets.

Port guest head

The port guest head is appointed with precision and refined finishes: ceiling lights operated by a dedicated switch illuminate the space, and a TECMA electric head with fresh water flush provides reliable, hygienic function. The stall shower is enclosed by a frameless glass door and lined with sintered stone on both walls and floor, while the CORIAN vanity top supports a sculpted wash basin, complemented by polished faucets and coordinated bath accessories. A lighted mirror above the wash basin and a built-in medicine cabinet add convenience, and natural daylight filters through a fixed hull-side window while a recessed window box with a manual shade offers privacy when desired. Practical systems are discreetly integrated, including an exhaust blower for ventilation and an AC GFI outlet for power, with the sintered stone flooring continuing the luxurious motif throughout the space.

Guest stateroom

The guest stateroom has been crafted for refined comfort and adaptability, featuring convertible twin berths with built-in storage drawers beneath and a carpeted passage between, accompanied by an elegant nightstand for personal items. A combined smoke and carbon-monoxide detector ensures safety and peace of mind, while a wardrobe finished with cedar lining on the rear interior surface and a mirrored door keeps garments fresh and conveniently accessible. The room's layered lighting enhances the atmosphere with ceiling fixtures controlled by a convenient switch, separate valance and floor lighting operated by their own switch, and two directional reading lights each fitted with individual switches. Natural illumination enters through a fixed hull-side window, softened when desired by a recessed window box equipped with a manual shade. For entertainment and connectivity there is a 24-inch TV with an integrated sound bar, alongside USB power outlets, an HDMI socket

and standard AC outlets.

Stateroom guest head

Thoughtfully appointed to combine contemporary finishes with everyday comfort, the stateroom guest head features overhead ceiling lighting operated from a convenient switch that softly illuminates a CORIAN vanity topped with an integrated wash basin, paired with refined faucets, coordinated bath accessories and a lighted mirror. Stowage is provided by a discreet medicine cabinet. A generous stall shower, enclosed by a frameless glass door, is finished with sintered stone walls and a matching shower floor, while the cabin continues with sintered stone underfoot for a cohesive, high-end look. Ventilation and natural light are supplied by an exhaust blower and a fixed hull side window set within a recessed window box fitted with a manual shade. Electrical requirements are served by an AC GFI outlet, and routine convenience is ensured by a TECMA electric head with fresh water flush.

Below deck foyer/passageway

Every element of the foyer and passageway is conceived for refined convenience: a built-in 27-inch GE washer paired with a matching 27-inch GE dryer makes laundry effortless at sea, while plush carpeting beneathfoot enhances comfort and muffles footfalls. An elegantly positioned wall sconce provides a warm accent glow, and switch-controlled ceiling fixtures offer bright, practical illumination precisely when required.

Port crew stateroom

The port crew stateroom is crafted for both comfort and functionality, offering upper and lower berths plus the reassurance of a combined smoke and

carbon monoxide detector. A wardrobe, cedar-lined on its back surface, preserves garments and equipment, while lighting is thoughtfully configured with overhead lights on a dedicated switch and two reading lamps that each have their own controls. Natural light pours in through a fixed hull-side window, complemented by a recessed window box fitted with a manual shade for privacy. Provisioning for entertainment includes mounting and wiring for a 24-inch wall-mounted TV with sound bar, and power is supplied by USB outlets in addition to an AC outlet. Beneath, durable AMTICO flooring delivers easy-care elegance appropriate to a hardworking crew space.

Captain's stateroom

A refined double berth nestles beside a fixed hull-side window and a recessed window box outfitted with a manual shade, inviting daylight or complete privacy at will. A 24-inch wall-mounted television with an accompanying sound bar provides onboard entertainment, while USB power points and an AC outlet make charging personal devices effortless. Storage is elevated by a wardrobe finished with a cedar-lined back surface, and a discreet fold-down writing desk delivers an orderly workspace whenever required. Lighting is layered for both atmosphere and function, with ceiling fixtures operated by a switch and a separate reading light on its own control. Safety and finish are equally considered, featuring a combined smoke and carbon monoxide detector and a durable, elegant AMTICO floor.

Crew head

Meticulously crafted for comfort and functionality, the crew head is softly illuminated by ceiling fixtures operated via a dedicated switch, casting light across a freshly painted interior set above durable AMTICO flooring. A TECMA electric head with freshwater flush is paired with a practical stall shower to

meet daily needs, while a CORIAN countertop houses an integrated sink beneath a mirrored medicine cabinet. Polished faucets and matching bath accessories lend a refined touch, and an exhaust blower ensures proper ventilation while an AC GFI outlet provides convenient utility.

Crew lounge

The crew lounge is designed for restful moments, furnished with an upholstered settee and a CORIAN-topped table, alongside a cabinet with a matching CORIAN surface that houses a sink and faucet, refrigerator and microwave oven. A twenty-four-inch wall mounted television paired with a sound bar provides onboard entertainment, while practical conveniences such as ceiling lights with switches, AC power outlets and USB charging ports are thoughtfully integrated. A watertight door gives direct access to the engine room, and the staircase to the aft deck is crowned by a sliding hatch of tempered glass set in a stainless steel frame. The space is finished with durable AMTICO flooring and is monitored comprehensively by the GARMIN/CZONE system.

Foredeck/side deck

The foredeck and side decks are conceived for leisure, with convertible sun pads that envelop an inviting sun lounge set upon a beautifully finished teak deck. Pop-up courtesy lights flank the sun lounge and are enhanced by additional deck-level courtesy lighting, together cultivating a refined evening ambience. Entertaining is effortless thanks to three drop-down oiled teak coffee tables with stainless steel cup holders, while a stereo and speakers supply an elegant soundtrack. Practicality is equally addressed with ample storage lockers—including a dedicated locker for the sea stairs—and discreet sockets for the awning post that allow swift deployment of shade.

Aft deck

Step onto the teak-laid deck and ascend the polished stainless-steel stairs to the flybridge, their teak treads and integrated courtesy lights gently guiding your way. A convertible fiberglass seat finished with upholstered cushions provides adaptable lounging options, while a painted fiberglass wet bar, capped by a CORIAN countertop, is appointed with a wash basin and faucet, a refrigerator and an icemaker. A fresh water washdown hose bib is discreetly stowed inside a cabinet alongside convenient storage lockers. Twin stairs descend to the transom sport deck and are secured by stainless steel gates, with overhead lighting featuring dimmer control and switch to tailor the mood. Practical refinements include USB power outlets and AC GFI outlets, a sliding hatch granting discreet access to the crew quarters, port and starboard capstans for confident line handling, a ZF remote engine control plug in for precise maneuvering, and a stereo system with speakers to complete the ambiance.

Transom swim deck

The teak-clad transom swim deck forms an elegant waterside retreat, appointed with shore power lockers on both port and starboard plus a dedicated locker for the shore power cable, and a freshwater shower that supplies hot and cold water to refresh after a dip. Practical safety features include a watertight door leading to the engine room and watertight hatches giving access to the gyro compartment, while generously sized storage lockers keep equipment neatly stowed. Pop-up cleats to port and starboard allow secure tender tie-up (not for towing), discreet step lighting bathes the stairs to the aft deck in soft illumination, and a versatile Z-Lift boarding platform makes boarding and water access effortless.

Navigation package

A meticulously integrated Garmin navigation suite instills confidence underway, featuring a Garmin 4 kW marine radar together with Garmin GPS, a depth sounder and a dedicated chart cartridge. Communications and situational awareness are further enhanced by a Garmin 25 W VHF, Garmin AIS800 and a Garmin gWind wind sensor, while onboard connectivity is provided by a 5G wifi network and a comprehensive CCTV camera system. All instruments are presented on 22-inch Garmin displays, and the yacht is delivered pre-wired for TracPhone V3/V3-IP.

AV package

An elevated onboard entertainment suite centers on a Samsung 4K TV complemented by Bose interior speakers and a matching Bose soundbar; Apple TV delivers seamless access to streaming services, while a Fusion stereo—responsible for driving high-performance JL Audio speakers—provides rich musical fidelity throughout, and an HDTV antenna completes the system to ensure crisp over-the-air reception.

AV electronics

At the skylounge helm a single H25 DirecTV High Definition MPEG-4 receiver is secured behind an APC UPS 600VA Battery Backup & Surge Protector, while visual entertainment is delivered by a Samsung 50-inch 4K Smart QLED Ultra HDTV with Quantum HD R and an Apple TV 4K 64GB; source selection and IR control are handled through an RCA-HT2 five unit IR kit. The region's audio is driven by a Fusion MS-RA770 Apollo and voiced by a pair of Sonance VP62R six-and-a-half-inch (165 mm) speakers featuring textured polypropylene cones, rubber surrounds and a pivoting mounting design, with additional satellite

radio capability provided by a Fusion SVX300 Sirius receiver.

On the flybridge, a Fusion MS-RA770 Apollo powers a pair of JL Audio 93728 M6-770X-C-GWGW 7.7-inch coaxial speakers, delivering open-air sound that remains full and detailed while underway.

Forward on the bow a JL Audio M6-650X-C-GWGW 6.5-inch coaxial with one-inch tweeter is paired with an Apollo MS-SRX400 Marine Zone stereo, the latter offering built in Wi-Fi, AM/FM, Bluetooth, Apple AirPlay, Wi-Fi audio streaming and UPnP to give the foredeck independent, modern-source playback.

The Portuguese bridge is served by an Apollo MS-SRX400 Marine Zone head unit with integrated Wi-Fi, AM/FM, Bluetooth, Apple AirPlay, Wi-Fi audio streaming and UPnP, which feeds a pair of JL Audio M6-770X-C-GWGW 7.7-inch coaxial loudspeakers fitted with one-inch silk dome tweeters, Gloss White Trim Ring (GW) and Gloss White Grille (GW).

Aft, two JL Audio M6-770X-C-GWGW 7.7-inch coaxial speakers with one-inch silk dome tweeters, Gloss White Trim Ring (GW) and Gloss White Grille (GW) are arranged as a pair to serve both the aft deck and the swim platform—one speaker for the aft deck and one for the swim platform. Entertainment flexibility in this area includes a Samsung UN32N5300 31.5-inch 1080p LED LCD TV, an H25 DirecTV High Definition MPEG-4 receiver and an Apple TV 4K 64GB, all managed and controlled via a Fusion MS-RA770 Apollo with a 4.3-inch capacitive touch glass LCD color display that supports AM/FM, Bluetooth, Wi-Fi audio streaming, digital optical input, USB audio, AUX x2, UPnP, MTP and is SiriusXM Ready, coordinated with an RCA HT2 five unit IR kit.

The main salon features a Samsung 75-inch 4K Smart QLED Ultra HDTV with Q HDR 8X paired with an Apple TV 4K 64GB and an H25 DirecTV High Definition MPEG-4 receiver, with system control routed through an RCA HT2. Immersive sound in the salon is produced by three pairs of Sonance VP62R

six-and-a-half-inch (165 mm) speakers with textured polypropylene cones, rubber surrounds and pivoting architecture, driven by a Denon 9.2 channel AVR X4500H 4K AV receiver supporting IMAX Enhanced, Dolby Atmos, DTS:X and Auro 3D. Continuous power conditioning and online protection are supplied by a Tripplite:SU1000RTXLCD2U Smart online 1kva double conversion 2u UPS, while low end and impact come from a Niles SW 6.5' powered compact subwoofer rated at 800 watt.

The master stateroom is appointed with a Samsung Q60R 65-inch 4K Smart QLED Ultra HDTV with Q HDR 4X, accompanied by a Bose Sound Bar 500, a DirecTV H25 High Definition MPEG-4 receiver, an Apple TV 4K 64GB and an RCA HT2 five unit IR kit, all backed by an APC UPS 600VA Battery Backup & Surge Protector with USB Charging Port for protection and reliable operation.

In the VIP stateroom a Samsung 55-inch 4K Smart QLED Ultra HDTV with Quantum HD R is paired with an Apple TV 4K 64GB and a DirecTV H25 High Definition MPEG-4 receiver, while a Bose SoundTouch 300 soundbar with Bluetooth, NFC pairing and Wi-Fi technology provides enhanced audio; system control is consolidated through an RCA HT2 five unit IR kit.

Each of the two guest staterooms is outfitted with an LG 24LJ4540 HD 720p LED TV (24-inch), a DirecTV H25 High Definition MPEG-4 receiver, a Bose Smart Soundbar 300 powered sound bar with built-in Wi-Fi and Bluetooth, an Apple TV 4K 64GB and an RCA HT2 five unit IR kit to ensure consistent connectivity and media options for guests.

The crew area includes an LG 24LH4830 PU 24 inch Class HD Smart LED TV with built-in Wi-Fi and Ethernet connectivity teamed with a DirecTV H25 High Definition MPEG-4 receiver and a Bose Smart Soundbar 300 with built-in Wi-Fi and Bluetooth, coordinated through an RCA HT2 five unit IR kit.

The crew cabin is equipped with an LG 24 inch HD Smart LED TV 24LH4830 PU with built-in Wi-Fi and Ethernet connectivity, a DirecTV H25 High Definition MPEG-4 receiver, an Apple TV 4K 64GB and a Bose Smart

Soundbar 300 with built in Wi-Fi and Bluetooth to offer full media capability for the crew.

In the captain's cabin an LG 24 inch HD Smart LED TV 24LH4830 PU with built in Wi-Fi and Ethernet connectivity is paired with a DirecTV H25 High Definition MPEG-4 receiver, an Apple TV 4K 64GB and a Bose Smart Soundbar 300 with built in Wi-Fi and Bluetooth.

The galley's audio presentation is handled by a Fusion MS-RA770 Apollo with a 4.3 inch capacitive touch glass LCD color display supporting AM/FM, Bluetooth, Wi-Fi audio streaming, digital optical input, USB audio, AUX x2, UPnP and MTP and is SiriusXM Ready, delivering sound through a pair of Sonance VP62R six-and-a-half-inch (165 mm) in ceiling speakers with textured polypropylene cones, rubber surrounds and pivoting architecture.

For satellite television the yacht is fitted with a KVH TracVision UHD7 to provide DIRECTV ultra high definition 4K TV at sea, with built in support for DISH Network and Bell, accompanied by a KVH TracVision UHD7 Empty Dome/Baseplate and a TracVision HD7/HD11 SWM Expansion Kit with sixteen tuners. The vessel is also prewired for an off-air antenna and prewired for a VSAT system.

Navigation electronics

Command and situational awareness begin at a helm dominated by three Garmin GPSMAP 8622 chartplotters, each featuring a 22-inch full-HD, sunlight-readable display, accompanied by a Garmin GRID (Remote Input Device) and a Garmin card reader with dual SD card slots for mapping. A Garmin GPSMAP 742 Plus touchscreen is installed in the crew quarters to provide convenient redundancy and separate monitoring. Long-range detection is provided by a Garmin GMR Fantom 56 six-foot, 50 W solid-state open-array radar on a pedestal; its MotionScope technology colors and highlights moving contacts to assist in collision avoidance, locating bird activity

and tracking weather. Network capacity is increased with three Garmin GMS 10 Network Port Expanders, while a Garmin AIS 800 Blackbox Transceiver, equipped with an internal VHF antenna splitter, permits the VHF and AIS to share a single antenna and includes an internal GPS with a connector for an optional external antenna. Clear, dependable voice communications are delivered through two Garmin VHF 215 VHF Marine Radios with Class D DSC, 25-watt transmit power and integrated GPS, supported by two Newmar PA-60/40 deck horn/hailer units, plus a further Garmin VHF 215 positioned in the crew area. Precision sonar and bottom-tracking come from a Garmin GSD 25 Advanced Sonar Module paired with an Airmar B744VL bronze transducer for depth capability in the 800–1,200 ft range. Weather and environmental data stream in via a Garmin GXM 53 SiriusXM weather antenna, while depth, speed, temperature and wind readouts are presented on a Garmin GMI 20 Digital Marine Instrument Display integrated through a Garmin GND™ 10 Black Box Bridge and a Garmin gWind™ Transducer, and supported by an Airmar DST800L-235-N2K bronze thru-hull long stem. Course-keeping and autopilot control are managed by a Garmin Reactor 40 steer-by-wire Standard Core pack, which includes a GHC 20 control head, and onboard vigilance both underway and at anchor is augmented by five GC 200 Marine IP cameras covering the engine room, port and starboard wings and the aft.

Connectivity aboard is built to match the vessel's performance systems. A high-power AN-7000 dual-band Wi-Fi client—the industry's first high-power, dual-band marine Wi-Fi solution—provides robust wireless linkup with high power radios, a high-performance chipset, Gigabit Ethernet and two four-foot Comrod antennas, operating at 2.4 GHz (802.11b/g/n) @ 1000 mW and 5 GHz (802.11a/n) @ 1000 mW. Cellular reach is extended by an MDS-242-A 4G LTE Advanced modem with dual SIM slots, and shipwide wireless coverage is delivered through six MAP-7 dual-band marine access points (2.4 GHz 802.11b/g/n and 5 GHz 802.11a/n). Network backbone and PoE power are handled by an SX-24P8 24-port managed switch with eight PoE ports (or up to

four PoE+), while resilient power protection is provided by a SMART750R SmartPro 120V 750VA 600W Line-Interactive sine wave UPS in a 1U rackmount form.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.

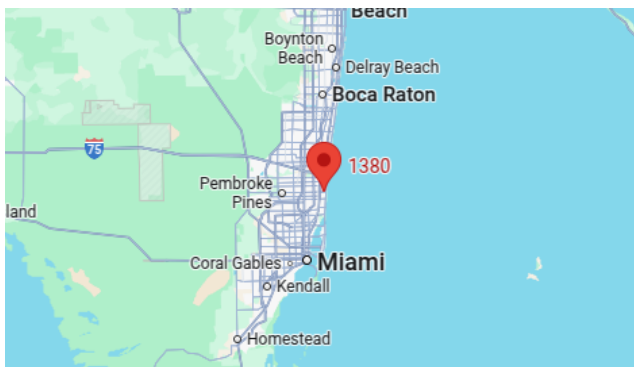

For more information and to view available yachts, you can visit the company's official website: <https://shestakovyachtsales.com>
