OVERVIEW

Built by Azimut, KOUKLES is a strikingly dynamic luxury motor yacht that pairs impressive performance with unusually generous volume for her length, wrapped in a chic, contemporary aesthetic. Inside and out she offers expansive living areas, from light-filled interior lounges to graceful alfresco decks, all framed by a sleek, modern profile; a full hull and superstructure repaint was completed in 2017, and a new teak deck was laid in 2024, further enhancing her presence. Her propulsion package benefited from a comprehensive engine overhaul in 2021 to ensure optimum reliability and speed, and she is fitted with zero-speed fin stabilizers to provide exceptional comfort both at anchor and underway. Already established in the charter market and attractively priced, KOUKLES represents an enticing option for an owner seeking elegant private cruising with strong revenue potential.

DETAILED DESCRIPTION

Accommodations

The yacht accommodates guests in four thoughtfully designed cabins: a master cabin with a double bed and ensuite facilities, a VIP cabin also appointed with a double bed and ensuite facilities, a guest cabin with a queen-size bed and ensuite facilities, and a guest cabin with twin beds and ensuite facilities. Inside, high-end materials define the spaces — a sliding door incorporates a leather insert in place of rice-paper, ceilings are upholstered in Alcantara fabric, and panels are finished in PELLE NUVOLA CAMELIA 158 with accents in SHINE CHROME. Faucets and taps are specified as new form 4900 Basic, the dining area is laid in cherry wood flooring, and the salon is edged by a wooden perimetral rim, all complemented by an electric Roman shade on the main deck.

Tenders & sport equipment

A refined 4.10m tender, driven by a Yamaha 60HP engine, stands ready to ferry guests to shore and reveal secluded coves, combining assured power, responsive handling and steadfast reliability for every coastal outing.

Generators & electrical equipment

A dependable electrical system is provided by two Kohler generators, each rated at 40 kW, and complemented by a 380 V shore power connection. The yacht's battery installation is meticulously arranged with four engine batteries, twelve service batteries and two generator batteries to ensure seamless power distribution both underway and while berthed.

Ancillary equipment

A reversible Cruisair air conditioning system delivering 96,000 BTU maintains a refined interior climate, while ABT-Trac zero-speed stabilizers keep the yacht serene and well-balanced even when at anchor. Hydraulic bow and stern thrusters provide the precise, confident control required for close-quarters handling, and onboard safety and service needs are met by a dedicated fire pump together with two boilers that ensure a continuous, dependable supply of hot water throughout the vessel.

Safety and security

Designed to inspire complete confidence, the yacht is equipped with comprehensive medical facilities and an integrated FURUNO alarm and monitoring system that maintains continuous oversight of all essential operations. Fire protection is meticulous: ten strategically positioned fire extinguishers, together with a smoke detector, provide early warning and rapid response capability. At sea, preparedness is further enhanced by two readily deployable ring buoys for swift recovery, while personal valuables are safeguarded in two secure on-board safes.

Communication equipment

A Furuno VHF radio, paired with a SatCom system, delivers crystal clear ship to shore communications and reliable long range connectivity, ensuring you remain seamlessly in touch whether cruising the coastline or venturing far offshore.

Navigation equipment

A traditional magnetic compass is complemented by a refined array of Raymarine instruments, including an echo sounder, a chartplotter and GPS both renewed in 2019, and a radar installed in 2020, creating a modern yet understated navigation suite. A McMurdo NAVTEX provides dependable weather and safety broadcasts, while the Raymarine autopilot reliably maintains an exact course, allowing you to cruise with confidence and ease.

Deck equipment

The deck has been thoughtfully specified with two anchor windlasses for confident management of ground tackle and two aft warping capstans to facilitate precise stern handling. An Opacmare crane ensures smooth and controlled transfer of the tender and equipment, while a Morsaverio passerelle delivers effortless, refined boarding. A powerful searchlight supports night-time operations, completing a suite of deck equipment crafted for seamless functionality and quiet elegance at sea.

Galley and domestic equipment

The galley is specified for gourmet service, outfitted with a Miele oven, a Miele stove with four burners, and a Miele refrigerator/freezer; a Subzero wine cooler and a microwave oven further enhance onboard culinary capability, while an elegant bar in the main salon keeps refreshments close at hand. For relaxed al fresco entertaining the sundeck provides a wet bar and a BBQ to elevate open air gatherings. Practical domestic needs are met by a Miele washing machine and Miele dryer, ensuring laundry is handled discreetly and with ease.

Refit summary

Throughout 2023–2024 the yacht underwent an extensive program of works and upgrades designed to preserve operational integrity and elevate onboard comfort. The engines received a full overhaul and a new Jacuzzi was installed on deck, while the cockpit benefitted from fresh interior leather upholstery; the galley refrigerators were comprehensively repaired and serviced. A thorough winter maintenance inspection was completed, including detailed checks of fuel tank tops and fittings, and the A/C fan coils were inspected and repaired as required. The teak decking was replaced in its entirety, and a fault with the main control screen was investigated and corrected. Issues resulting from flybridge furniture and Jacuzzi detachment were rectified by securing fittings and connections, and thruster hoses were examined for condition and serviceability. To permit essential stabilizer actuator works, access openings were temporarily created in the master cabin floor and adjacent storage areas and subsequently restored; the stabilizer fins and actuators themselves were then serviced. Both bow and stern thrusters were inspected and had gear seals renewed, the bilge pump was overhauled, and windlasses received scheduled maintenance, while ropes and mooring cleats were removed for repair and reinstated. The flybridge crane was taken ashore for maintenance and repairs before being reinstalled, and the gangway was removed to allow high pressure hose replacement, power pack inspection and repair, followed by reinstallation. Capstans were inspected, removed, repaired and refitted. GRP repairs to deck surfaces were carried out with precision leveling and priming of finished areas. Tailshaft seals were inspected with gaskets renewed and a broken seal repaired, bearings and propellers were checked, and the generators' alternator bearings were replaced with rotors cleaned to complete the machinery works.

In 2020 the yacht received winter maintenance together with a series of tasteful exterior and interior upgrades undertaken for safety and flag

compliance, complemented by new linen and beach towels, new dinnerware and a refined enhancement of interior finishes.

Machinery

At the core of this yacht's performance are twin Caterpillar C32 ACERT 12V engines, each producing 1,800 hp and coupled to ZF gearboxes that drive substantial five blade propellers; this precisely matched propulsion system provides confident, efficient thrust and records a fuel consumption of 450 liters per hour.

CONTACTS

Shestakov Yacht Sales is a brokerage company specializing in the sale and service of yachts worldwide. The company offers services for buying and selling both new and used motor yachts, sailing vessels, and luxury superyachts. They also provide yacht registration, insurance, technical maintenance, crew selection, and charter organization services across the U.S., Canada, Latin America, the Caribbean, and the Bahamas.

The founder and lead broker of the company is Andrey Shestakov, a licensed and certified expert with extensive experience in marine engineering and shipbuilding.

The company has an extensive network of partnerships with major yacht manufacturers worldwide and provides services in multiple languages, including Russian, Ukrainian, Spanish, and English. The office is in Dania Beach, Florida, USA.
