OVERVIEW

Delivered in 2024 and currently lying in Turkey, this 98-foot motor yacht is a refined synthesis of Italian styling and contemporary seafaring capability. An Arcadia Yachts-designed hull gives her sculptural, flowing exterior lines while Hot Lab's interior work transforms the cabins and social spaces into a couture-inspired sanctuary. Constructed with an advanced fiberglass composite monohull and finished with fiberglass decks, she balances structural strength, efficiency, and hushed comfort, and her broad 24-foot beam creates unusually generous volume for a vessel of this length.

Expansive glazing invites daylight deep into the main salon, where an open-flow layout fosters effortless movement from lounge to dining and through to the aft cockpit, the spaces feeling continuous and airy. The foredeck provides a private lounge with sunpads and built-in settees, while a commodious swim platform makes anchoring simple and offers easy tender access for days of watersports. Hot Lab's signature attention to materials and tailoring is evident throughout: bespoke furnishings, layered textures, and a calming modern palette suited to both sunlit cruising and evening entertaining. The full-beam owner's suite is a tranquil retreat of understated luxury, complemented by meticulously appointed guest cabins arranged for comfortable overnight stays. Crew circulation has been discreetly planned and service areas—including a professional-grade galley—are thoughtfully located to support seamless hospitality and preserve owner privacy.

Underway, twin diesel engines push the hull to a confident 20-knot cruising speed and up to 25 knots at top end, making island hopping and coastal passages swift and assured. A shallow draft of just under 6.6 feet extends the yacht's reach to bays and harbors that deeper vessels cannot access, while generous tanks—approximately 3,170 gallons of fuel and about 528 gallons of fresh water—allow for extended passages without compromise. From morning

coffees while underway to golden-hour cocktails on the flybridge, this 2024 new-build combines the presence and refinement of a superyacht with the nimble, comfortable performance expected of a modern Mediterranean cruiser.
