DETAILED DESCRIPTION

Upgrades

This yacht has been significantly upgraded, ensuring it is outfitted with the most advanced technology and enhancements for an unparalleled sailing experience. The Volvo engine received meticulous servicing at around 690 hours in December 2023, guaranteeing peak performance. The hull was treated with a new layer of antifouling paint in April 2023, offering protection and enhancing its sleek look.

Among the major upgrades primarily completed in April 2023, the yacht now includes a Code 0 sail with a Facnor furling system and sailbag, along with two extra winches, providing a total sail area of 65 square meters. The solar power system has been improved with a charger and additional batteries, totaling six AGM batteries with a combined capacity of 990 AH, ensuring sufficient power for long journeys.

The navigation system has been enhanced with an extra Raymarine Axiom 9" chartplotter, making it two in total, and a fully integrated Raymarine Quantum 2 radar on the Raynet network, offering comprehensive situational awareness. The watermaker has been upgraded to a Seawater Pro model with a capacity of 40 gallons per hour, installed in December 2023, ensuring a steady supply of fresh water.

In August 2023, the engine's temperature and RPMs were integrated into the chartplotter display for seamless monitoring. The yacht's sailing capabilities have been improved with the addition of a third reef to the main sail, and an extra anchor has been added for enhanced security. The shore power system now includes an additional charger for 110V, complementing the original 240V system, providing versatile power options.

This yacht also features many elements from the premium package or add-ons

included in the original 2021 model. These include a 12V bow thruster with a dedicated battery, Fusion Audio for excellent sound quality, a helm bimini for shade and comfort, a remote windlass for easy anchoring, an electric dinghy lift system with remote control, and an electric winch for effortless handling. With these extensive upgrades and features, this yacht is exceptionally well-prepared for both relaxing cruises and adventurous voyages, offering an ideal combination of comfort, performance, and state-of-the-art technology.

Disclaimer
