OVERVIEW

"JOY" is an almost-new BENETEAU Oceanis Yacht 60, based in Long Beach, CA, whose seasoned owner chose nearly every premium option to craft the ultimate West Coast sailing yacht. This desirable 3-cabin, 3-head arrangement boasts a fully outfitted forward crew cabin and a superb forward, athwartships galley, seamlessly marrying comfort and functionality. These features are the hallmarks of a luxury monohull, bluewater cruiser, performance cruiser, and cruising sailboat. LLC Owned.

DETAILED DESCRIPTION

Additional description

Specified to the Luxe Trim level, this yacht is optimized for effortless performance and indulgent comfort, combining push-button sailing with premium onboard amenities for long-range cruising. Sailing systems include an electric jib furler, a Code zero on an electric furler and all electric winches, complemented by Beneteau's Upwind and Downwind pack to deliver confident sail handling in every point of sail. Warm teak graces the cockpit and side decks while a white painted mast carries LED uplighters and downlighters on the spreaders, providing atmospheric illumination. Entertaining is elevated with a wine cooler and underwater lights, and dependable power and maneuvering come from a 150 HP Yanmar direct drive diesel engine with line cutter, bow and stern thrusters, electronic Yanmar engine controls and a full suite of Raymarine electronics. Long range comfort is assured by the generator and air conditioning, a semi rigid bimini and a factory dodger with cockpit cushions, along with protective covers for the winches, table and pedestals, and a tender garage equipped with an electric loading system for effortless deployment.

Deck

The deck layout is conceived for relaxed cruising and effortless entertaining, centered on two beautifully varnished tables that seamlessly convert into expansive sunbeds while additional sunbeds with raised backs flank the companionway and a generous forward sunpad crowns the foredeck. All winches are electric for single handed ease, and an electric retractable transom door with remote control transforms the stern at the touch of a button. Ground tackle is serious and ready with a Delta eighty eight pound

anchor, 230 feet of one half inch anchor chain and 164 feet of seven eighths inch anchor rode, supported by a fresh and salt water anchor washdown pump. Charcoal grey covers protect the pedestals, winches and tables and are matched by a factory dodger and a foredeck sunshade in the same charcoal tone. Shade and shelter come from a semi rigid Bimini with retractable grey canvas while twin helms are framed by black composite wheels. Entertaining is effortless with a refrigerated cockpit cool box below the port side helm seat and a Magma propane BBQ, and the electric tender loading system streamlines launch and retrieval for carefree days at anchor.

Under water

Beneath the waterline the yacht balances shallow draft convenience with secure control, its shallow cast iron keel of seven feet three inches paired with twin rudders for precise tracking. Propulsion is delivered by a four blade Flex Fold folding prop on a direct shaft drive for efficient thrust, while a Shaft Shark line cutter is fitted to the prop shaft to protect propulsion. Underwater lights add drama at anchor and maneuverability is further enhanced by a bow thruster and a retractable stern thruster, with kelp deflector blades mounted ahead of the rudders to keep the foils clear.

Electronics

At each pedestal a Raymarine Axiom Pro twelve inch multifunction touchscreen puts navigation and sail control within immediate reach, complemented by Raymarine ClearCruise augmented reality cameras mounted on the spreaders. The helm suite features a Raymarine P70S autopilot with hydraulic ram and an S100 autopilot remote, a Ray 90 VHF radio with wireless handset and a Ray 91 VHF with AIS receiver, together with Raymarine speed, depth, wind and temperature instruments. Situational

awareness is heightened by a Raymarine Quantum Doppler 2 radar while a second Raymarine Axiom Pro twelve inch screen sits at the chart table. Entertainment is refined with HD smart TVs in the master cabin and salon, Ship control integration for seamless systems management and a Fusion Apollo RA670 audio system with PW speakers and a bass box in the salon plus two Fusion speakers in the cockpit.

Accommodations

A three cabin, three head layout sets a luxurious tone throughout a gloss oak Alpi wood interior, with the master cabin showcasing an innovative forward facing, centerline island berth and a master head with a separate stall shower for true owner privacy. Tecma electric flush heads serve the master and both guest cabins, and in the salon an electric table pedestal converts the seating area into a generous double berth for additional sleeping flexibility. The master benefits from a custom memory foam mattress and all beds are dressed with custom sheets. Forward of the main accommodation a dedicated crew cabin provides a head, shower and two bunks, while the athwartships galley is appointed for serious cruising with extra refrigeration, a freezer, an icemaker and a wine cooler.

Mechanical and electrical

Power and autonomy are delivered by a Yanmar 150 HP direct drive diesel engine and a Cummins Onan 13.5 kW generator, supported by 56,000 BTU air conditioning for comprehensive climate control and a 2000 watt inverter for silent AC power when underway or at anchor. Ground tackle and deck handling are made effortless by an electric anchor winch and electric deck winches throughout.

Sails and rigging

Designed for refined performance, the yacht carries Beneteau upwind and downwind packs with a genoa on an electric furler and a Code 0 handled by an electric furling system to make reaching and running effortless. A white painted mast is highlighted by LED spreader uplighters and downlighters and Raymarine forward and aft facing video cameras on the spreaders enable augmented reality underway. Efficiency and sail control are further enhanced by a self tacking jib track and hardware, an additional upgraded spinnaker halyard and an upgraded topping lift. A polyester bowsprit provides dedicated attachment points for the Code 0 and spinnaker, and all Harken winches are electric and controllable from the steering pedestal for safe, centralized operation.
