OVERVIEW

Setting the benchmark for opulent performance cruising catamarans.

As an HH66 Catamaran, "FLASH" is among the pioneers in a new series of luxury performance cruising catamarans, establishing the benchmark for high-performance luxury sailing. With its Morrelli & Melvin design heritage, expansive interior spaces, and innovative use of cutting-edge materials, FLASH achieves a level of performance and luxury previously unseen in this category of swift sailing catamarans. Performance is at the core of its design. Crafted for comfortable cruising, yet capable of accelerating with impressive speed when desired. Modern hull shapes, featuring the latest generation curved C daggerboards, incorporate insights from recent America's Cup campaigns. Constructed entirely from carbon fiber composite sandwich, the hull and structure boast remarkable strength and rigidity, while the interior, crafted from lightweight cored panels and adorned with exquisite wood and stone veneers, offers an unparalleled quality finish. Not a mass-produced vessel, the HH66 caters to the most discerning yachtsman.

Distinctive styling, innovative sailing systems, and a stunning interior make FLASH an extraordinary yacht. High-performance features render this boat a formidable competitor in any race. Its efficient design allows for cruising or swift passages, achieving comfortable +350nm days. The unique styling and exquisite finish provide unmatched comfort and ambiance. Whether you wish to race, cruise Caribbean waters, explore the South Pacific, or relax in a Mediterranean fishing port, FLASH will be the most admired craft in the bay.

From the designers: "The HH66 embodies the evolution of Morrelli and Melvin's 25 years of performance catamaran designs. We have integrated lessons from three America's Cup campaigns, world records, 24-hour records, and over 25 custom cruising cat designs for discerning owners, ranging from 46ft to 90ft. We have listened to, cruised, and raced with our clients to

understand their needs, incorporating these ideas and features into the design of the HH66 Super Cat. In collaboration with Hudson Yacht's international team of design engineers and builders, we have endeavored to bring the finest equipment, building materials, and techniques to this next-generation performance luxury cruising cat. Utilizing state-of-the-art, lightweight, and strong materials allows us to maintain an exceptionally high degree of luxury finishes and details, not typically found in performance cruising cats. The HH66 is a lightweight and robust race boat in disguise, enabling owners to enjoy all the comforts of home, making any time spent on board luxurious, enjoyable, and safe." -- Gino Morrelli - Morrelli & Melvin --
