Water Capacity: 122 Gallons

Holding Tank: 40 Gallons

Fuel Capacity: 528 Gallons

Accommodations

Total Cabins: 2

Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Engines: 2

Manufacturer: Cummins

Model: QSC550

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

Accommodations

The 41' Riviera is laid out with the master stateroom forward with an island queen sized berth. There are several storage bins on the sides of the cabin, drawers and a large storage locker under the berth, storage locker to port, and a hanging locker to starboard. Aft, a door leads to this stateroom's port side ensuite head. This head features a Vacuflush toilet (with tank watch), vanity, and a generous sized separate stall shower. To starboard is the guest stateroom with berths for three. Along the outside wall is a fixed single berth, inboard is a single that can be folded out of the way when not in use. Above is a third single that lays across the cabin and slides aft out of the way when not in use. There is a hanging locker and several other storage compartments. Across the companionway is the guest/day head with Vacuflush toilet, vanity and shower. Four steps up and to port is the mid-level galley with under counter refrigerator and freezer, two burner electric cook-top and microwave/convection oven. There is a hatch in the floor that accesses a very large storage area. In the salon there is an "L" shaped dinette in the forward stbd corner (with custom made table protection cover.) This very knowledgeable owner had the factory delete the standard "L" shaped settee from the port – aft corner. In its place they installed a more comfortable leather sofa with a custom built cherry table aft of it. A leather chair sits along the aft bulkhead. There is a cherry coffee table in front of the sofa that is also used on the flybridge. An LCD TV is installed on the stbd side dashboard. Aft of the dinette, on the stbd side, is the bar area with another refrigerator (with icemaker) and a cabinet for bar-ware. In the starboard side overhead there is a hidden rod storage locker that opens electrically.

A swinging door on the starboard side of the aft bulkhead provides access to the large cockpit. there you will find a teak laid floor, side steps and salon entry step. There are storage cabinets under the coaming all around the cockpit and a large storage area and fish box under the deck. A sink with hot and cold water is on the forward bulkhead along with a freezer cabinet which runs off of its own compressor and a door providing access to the engine room. On the transom there is a glass sided bait tank with built in pump and lights and a door leading to the teak laid swim platform. The tournament style flybridge has an aft helm station with a nicely laid out panel for the Furuno displays. To starboard, and forward of the console, is an L-shaped settee To port is a fore and aft oriented bench seat. There is a 12V refrigerator and sink with hot and cold water on the port side of the bridge. A great deal of storage is provided under the console and seats and in the forward flybridge coaming. The flybridge is carpeted and protected from the weather by a hardtop and full enclosure. There is a locking hatch on the F/B stairs provides safety and security.

Deck Equipment

- Flybridge hardtop
- Flybridge full enclosure (clears)

- Flybridge carpet
- Flybridge sink with hot and cold water
- Flybridge refrigerator
- Flybridge overhead hatch (through hardtop)
- Locking hatch to F/B
