SPECIFICATIONS

Overview

With the Ferretti 630, the Ferretti Engineering Division together with Studio Zuccon International Project define new standards, achieving the design of an incomparable yacht for

space and luminosity. An extremely aggressive external line due to an innovatively unique

spherical glasswork, offers 360° visibility of the sea from the bow to the stern. The addition of

the large open-view window in the master cabin is an important and ambitious optimization of

space that makes the 630 a seemingly larger boat. Elegance and versatility of use characterize

the small sofas and tables on the flybridge and lower deck, where a teak table able to seat up to

8 guests has also been added. The revolution of all spaces is clearly visible as soon as one

opens the balanced door to the lounge area where an open space area permits to have all the

spaces in one: the American style galley, completely separable thanks to the transparent sliding

door, face the salon as the pilot house which is in direct communication of the living. The

lower-deck VIP and guest cabins have been smartly finished and take advantage of an exceptional rationalization of spaces, while the master cabin has been gloriously enriched with

the open-view window featuring openable portholes offering incomparable light and space. The

yacht's performance speaks for itself: a maximum speed of 33,5 knots with two 1224

horsepower common rail MAN engines. The new Ferretti 630: the revolution of space.
