Total Cabins: 3

Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Engines: 1

Manufacturer: Yanmar

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

Broker's Comments

After sailing a Hunter 49 (now the 50) from Florida to Mexico in the St Pete to Isla Mujeres race, my opinion of Hunter products has forever changed. Not only was this Glen Henderson design super fast and extremely easy to sail, she was comfortable and sea-kindly even when the seas were 25' high with gusts up to 40 mph. The fine entry of the bow section allowed this boat to slice through the waves without pounding nor did this boat moan, groan or rattle as she raced to the finish. This sailing experience showed me first-hand that in 40 years, Hunter has come a long way in yacht construction, engineering and design since her early years as an entry level boat. Touring the factory further showed Hunter's commitment to quality, performance and value. How many manufactures are using kevlar in their hulls for greater strength and protection?

The new Hunter 50 Aft Cockpit is the latest edition to this evolving line of quality boats. If you are considering a roomy 3 stateroom boat that is excillerating to sail, easy to maintain and an excellent value, seriously consider this Hunter 50. Don't take my word for it. Come see this boat and then let's visit the factory, maybe your opinion will change like mine did.

In-Mast Main verse a Standard Main

Is there a right or wrong answer?

In selecting a boat, everything is a compromise. Do you buy new or used? Do you finance or pay cash? Center cockpit or aft cockpit?

With Main sails there are pros and cons to in-mast furling verses a standard rig. In the case of this Hunter 50, a standard rig was selected for its greater sail area, better performance, dependability, greater stability since there is less weight aloft and it is quieter than a slotted mast. With a Dutchman system, the mainsail is controlled without leaving the safety and comfort of the cockpit and will fall easily into a sailcover/bag on the boom.

Mike Harker sailed a stock Hunter 49 around the world single handed and he chose a standard rig. What makes this accomplishment even more amazing is that Mike was a paraplegic from a hang gliding accident!

Manufacturer Provided Description

A luxurious passagemaker with a versatile floor plan for total extended offshore cruising, the Hunter 50 offers a complete range of live aboard accommodations and outstanding entertainment features. With an overall length of 49 feet 11 inches, plus a 14 feet, 5 inch beam and 6 feet 9 inches of salon headroom, the Hunter 50 is a BIG boat with impressive interior volume. Driving

the Hunter 50's hull is a specially engineered sail plan that achieves maximum efficiency while maintaining the Hunter trademark of single-handed sail-ability, which is a great feature for a boat of this size. Components aboard the Hunter 50 include Hunter's famous mainsheet traveler arch, backstayless B & R rig, a battened full roach main sail, and two headsail options: single self-tacking jib or self-tacking staysail with overlapping jib. A dual-ended mainsheet allows adjustments from both the cockpit and companionway, and all sheets and halyards end at the cockpit.
