Fuel Type: Diesel

DETAILED INFORMATION

Broker's Comments

RARE DUTCH BUILT FIBERGLASS MOTORSAILER "Thalassia" is a pedigree yacht, built by some of the finest yacht builders in the world and recently completed a multi year upgrade

Henk Lunstroo, painstakingly designed this magnificent yacht in fine detail to be able to cruise the oceans of the world and turn heads in every port. Her lines are sleek and powerful, yet elegant and graceful. More contemporary boats will not match "Thalassia's stunning good looks or inviting interior warmth and spaciousness.

The Dutch builders of this yacht created a masterpiece by combining old world craftsmanship and engineering with the durability and dependability of fiberglass. Today, most of the premier mega yachts of the world are built by the Dutch. "Thalassia" is an excellent example of their earlier work.

Purchased over 20 years ago, the current owner is a meticulous mechanical and electrical engineer who upgraded all the mechanical, electrical and plumbing systems using the best materials and equipment available. "Thalassia" spent 16 years in the great lakes before sailing to Florida in 2008.

This rare gem is now available for purchase. A yacht like "Thalassia" does not become available very often. I invite you to explore this exceptional yacht for yourself or examine the extensive high definition pictures.
