Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Manufacturer: None

Fuel Type: Diesel

DETAILED INFORMATION

NEW PRIVILEGE 745

2014 PRIVILEGE Above all relax....decadent benches, sofas and tables, the fly bridge is a spacious and elegant haven for relaxation inspired by the world's most luxurious resorts. The magnificent fly bridge can be easily accessed from the cockpit via the teak spiral stairway. Marc Lombard's design excellence is proven once again with the volume created by the bridge deck helm station. All sail handling systems and controls can be operated from here leaving the aft fly deck uncluttered and completely available for guest enjoyment, entertainment and alfresco dining.

The flagship Privilege 745 is a stunning masterpiece of advanced technology and quality craftsmanship. The bridge deck is used to full advantage with the added benefits of a seating area, table and a sunbathing platform allowing guests to view dazzling surroundings while sailing crystal blue waters.

The hull, the nacelle (main pod), and the deck are fully vacuum infused on a strong base of glass / vinylester sandwich.

The internal structure is made up entirely of transversal and longitudinal vacuum sandwich bulkheads, directly stratified to the hull and the deck.

Strength and lightness are ensured, whilst allowing some flexibility (needed by the forces applied during offshore navigation).

The necessary monolithic areas and the various reinforcements are also built by vacuum infusion. A vinylester anti-osmosis barrier is applied to the whole structure.

In complement to the usual EC certification, the famous survey office BUREAU VERITAS has been hired by the shipyard, on a yearly basis, in order to control and certify each unit built; the requirements are strict.
