DETAILED INFORMATION

Sunreef 70 Power - 2011

DAMRAK II is an upgraded version of DAMRAK launched in 2009 and owned by a French citizen. The yacht is the sixth unit of the popular 70 Sunreef Power model offered since 2008. This model has been designed by the Sunreef Yachts design studio with the assistance of Laurent Bourgnon, a famous French sailor and owner of the first unit (JAMBO – now in French Polynesia). It was designed as a stylish, fast and stable power vessel with a fine-tuned line of the hull and its underwater section. The streamlined hull helps to take advantage of the wave power and reduce fuel consumption, especially when combined with low draft and light hull structure.

With its generous equipment that includes: Jacuzzi on the sun deck, water scooter, Seabob for discovering underwater treasures, scuba diving equipment, swim platforms with ladders, complete TV and audio equipment with Bose Lifestyle sound system, beautiful owner's suite with a closet and spacious bathroom and luxury guest cabins finished in genuine Canaletto walnut wood and cream Alcantara, DAMRAK II is an ideal yacht for holiday and charter cruises. The interior of the yacht is divided into the common living space and private cabins. The spacious living-room is accessible from the cockpit. The living-room is combined with the dining-room and fully equipped kitchen (four-zone induction cooker, microwave oven, two electric ovens, large refrigerator and freezer, dishwasher, wine chiller, ice dispenser, many storage compartments and bar-table). One VIP, two double guest cabins with individual bathrooms and one crew cabin are available directly from the living-room. In the mid-ship section, there is a lower helm with complete navigation, communication and control equipment. Another comfortable sofa in this area means the captain need never drive alone. The helm station leads to the owner's cabin located in the foredeck section, along the fly bridge. The owner's cabin is furnished with a king-size bed, desk, sofa, night tables and bathroom located in the starboard hull. Panoramic views of the sea can be enjoyed from the owner's cabin. From the lower helm, also the sunny fly bridge – the Sunreef trademark – is accessible. The sun deck is a place where traveling by sea can be most enjoyed. In addition to the fly bridge, there is also a cocktail bar with two bar chairs, barbecue equipment, dining table with sofa and armchairs, Jacuzzi, sunbathing mattresses and a water scooter lowered with a special hoist. The cockpit of DAMRAK II is an ideal place to relax from burning sun or have lunch with friends in refreshing sea breeze. The cockpit is furnished with a large dining table, sofa, chairs, resting mattresses, a wash basin for quick freshening up and small handy refrigerator. Supplies for longer journeys or water toys can be neatly hidden in storage compartments. More sunbathing mattresses with special drink holders can be found in the bow section. Guest may enjoy beautiful sights and sunbathe comfortably at the same time.

DAMRAK II is the first Sunreef power yacht equipped entirely in LED lights with means lower energy consumption than with regular lighting.

Exclusions

Owner's personal belongings.
