SPECIFICATIONS

Overview

GENERAL DESCRIPTION

Much talked about and admired, TEMPUS FUGIT is the first of the TEMPUS 90 Class built to a high standard of cold moulded construction, she features accommodation for seven guests in 4 guest cabins and 3 crew in two cabins.

Launched in August 2013 by the ARKIN PRUVA shipyard; this Rob Humphreys design has proven to be a superb performance cruiser capable of both race winning performance: having *participated and distinguished herself in the Voile de St Tropez, Loro Piano and NYYC Annual regattas* and on her maiden *TransAtlantic voyage* proving her blue water credentials. TEMPUS FUGITS generous accomodation is finished out in the Herreshoff style with a beautifully crafted raised panel joinery of Teak, select polished marbles, and period stainless fixtures.

Her cold moulded, wooden construction - in Acajou (better known as African mahogany) planking on Akajou frames has 5 layers of veneer laid both diagonally and longitudinally to provide maximum strength and a smooth finish.

DETAILED INFORMATION

GENERAL DESCRIPTION

PRELIMINARY LISTING Much talked about and admired, TEMPUS FUGIT is the first of the TEMPUS 90 Class; built to a high standard of cold moulded construction, she features generous accommodation for seven guests in 4 guest cabins and 3 crew in two cabins. She has a spacious full beam main salon with seating for eight; or dine al fresco and relax in her equally spacious center cockpit.

Launched in August 2013 by the ARKIN PRUVA shipyard; this Rob Humphreys design has proven to be a superb performance cruiser capable of both race winning performance: having *participated and distinguished herself in the Voile de St Tropez, Loro Piano and NYYC Annual regattas'* and on her maiden *TransAtlantic voyage* proving her blue water credentials. TEMPUS FUGITS' interior is finished out in the Herreshoff style with beautifully crafted raised panel Teak joinery, select polished marbles, and period stainless fixtures. Her cold moulded, wooden construction - in Acajou (better known as African mahogany) planking on Acajou frames has 5 layers of veneer laid both diagonally and longitudinally to provide maximum strength and a smooth fair hull. The topsides are finished with *Awlgrip's* new ultra low maintenance *Alwood* varnish, giving her a beautiful shine that's easy to care for from stem to stern.

BILGE PUMPS

Gianneschi pumps

The main bilge system consists of a central bilge manifold with pipes to pickup points with strainers in crew area, guest bathrooms, main accommodation, engine room and lazarette. The forepeak can be drained with a manual bilge pump. The system is served by a 24 V electric bilge pump, located in the engine room.

By switching of valves, the bilge pump can be connected to the the fire fighting system, enabling both pumps to act as backup for each other.

A separate stripping system consists of a 24V submersible pumps in accommodation (2), engine room (1) and lazarette (1). These pumps are activated by float switches, except for the one in the engine room which is activated with a manual switch. Outlets for these pumps are combined with each other and with other through hulls or anchor locker to minimize the number of through hull fittings.

FIRE PUMPS/SAFETY

Sea water system using a 220v electrical

fire fighting pump driven by the generator. The pump draws from the main sea chest and supplies sea water to a hydrant with local valve in way of the aft cockpit. All piping to be stainless steel.

By switching of valves, the fire fighting pump can be connected to the the bilge system, enabling both pumps to act as backup for each other.

Chemical Fire Fighting

In the engine room, an FM 200 fixed system for manual release is fitted. The system can be released from outside the engine room.

Fire extinguishers

Fire extinguishers, in accordance with the MCA regulations, as follows:

- Galley
- Main Salon
- Lazarette
- Engine Room
- Cockpit
- Forepeak

- Crew area
- Guest cabins
- Master cabin

In the galley, a fire blanket is installed.

Smoke detectors will in all cabins, main salon, galley, forepeak, engine room and lazarette, and connected to the alarm and monitoring system.
