DETAILED INFORMATION

REMARKS

Elegance, comfort, space... the 100 Motoryacht is measurably larger than other yachts in its class. Right down to the galley — specified to satisfy demanding charter requirements — you'll see and feel the 100's generosity and precision everywhere.

Ocean Alexander uses inventive aluminum-beam engineering to bring you the most massive window views of any yacht this size. They have scaled living space upward in the 100 using strategies usually found only in megayachts. With increased spaces in the galley and crew area, this yacht is perfect for private ownership or charter.

CONSTRUCTION

GENERAL

- Vinylester resin with high-density structural foam. High density allows for high temperature resistivity and particular advantage in thermal and acoustic insulation. (Usually only found in vessels 135'+)
- Longitudinal and lateral fiberglass stringers filled with high-density foam
- Ocean Alexander employs various techniques to reduce sound and vibration. Focusing on providing a quiet and comfortable yachting environment through various proprietary techniques of controlling sound and noise transmission. Some of these techniques include, multiple insulation barriers including reflective materials, absorptive materials, dampening materials, air pockets and flexible and isolation mounts. Ultimately resulting in vibration/sounds levels that are industry leading and at times 1/2 to 1/10 of ISO-6954 requirements (Unique OA feature)
- Sylomber floating floor system (Unique OA standard, usually found ON 130'+ vessels)
- Fiberglass within fusion lamination manufacturing technology
- Reinforced collision bulkhead
- Frameless window
- All exterior hardware to be S/S316 or to manufacturer requirements
