## Overview

---

This semi-custom, 2011 Statement Marine 37' SUV model has twin 2013 Mercury 370 HP TDI Diesels and 2013 Bravo 3 XR racing drives. The engines and drives have only 60 hours. The boat ran the Bermuda Challenge in August 2012 and broke the record for the run from New York to Bermuda. The original promotional engines, the first set ever run from Mercury, were exchanged for new after the race in accordance to their promotional agreement.

The 37' SUV has a deep vee (24 degree transom deadrise) high-performance hull. With the twin 370 TDI Diesels the boat gets better than 2 MPG at cruise (40 mph) and 55 MPH at wide open throttle. A first ever shock-mitigating deck was installed. The deck rides on a combination of airbags, shock absorbers and load levelers. The combination of a rock solid build, a refined hull design and the custom shock-mitigating deck makes for an incredible ride.

Amenities include a head in the console with 6' 4" of headroom and an easy to clean all fiberglass interior. It has a single level cockpit with built-in forward and aft seating. At the transom is a built-in swim/dive platform with a rear-facing seat. For the fisherman a 60 gallon lighted livewell is incorporated in the rear of the helm seats. The electronics are by Simrad and are extensive. This is a great all around family center console that delivers speed, efficiency and ease of handling.
