Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

Engines

Total Power: 870 Cruising Speed: 23 Max Speed: 29

Tanks

Fuel: 476 Fresh Water: 122 Holding: 40

Accommodations

Below decks there is sleeping accommodation for up to six in two large cabins. The forward master stateroom features a queen sized two meter long double bed, with a cedar-lined hanging robe, extensive storage and an ensuite bathroom. The aft, full beam cabin has large port lights with optional portholes either side for natural light and cross ventilation. A large skylight under the forward saloon windscreen provides additional light to this cabin creating a very bright and welcoming space.

Salon

The main saloon is both beautiful and practical, with seating for seven in a U-shape lounge to starboard around a generous sized, timber folding table. To port is a two-seater leather lounge that can be brought forward to the saloon table as two separate dining chairs. When not required, the chairs are stowed neatly between the bar and open plan galley on the port side.

Electronics and Navigation

Of course handling the new 43 Open Flybridge in close-quarters is made care-free via the use of the integrated joystick control.

Controlling all onboard electrics is the digital CZone system. A revolutionary solid state Controller Area Network (CAN) bus design, that allows for the ultimate in customization and finger-touch control of all aspects of electrical operation, from entertainment lighting to navigation equipment. There are multiple custom settings for easy operation and the CZone system allows for the ability to 'drill down' within each setting in order to control or change specific operations. In fact CZone talks the same data language as the Volvo Penta IPS system, so all your engine parameters are metered through the same monitoring system.

Electronics: Twin Garmin Display 5217 GPS with HD Open Array Radar and Garmin Autopilot.

SAT TV and upgraded JL Audio speakers with subwoofers in flybridge and salon.

Flybridge

“This new model recognizes that the way people use their boat is changing,” notes Riviera’s Neil McCabe. “A Flybridge boat is just not used for fishing; they’re extensively used for entertaining and longer-term cruising. Our owners are changing the way they boat and our new designs reflect this transition.” The Flybridge, accessible from the cockpit via a new design ‘stair-ladder’, offers 360 degree vision with minimal interruption, thanks to a new structural hard top canopy. Swivel companion and helm chairs allow finger tip console control while there is seating for four in an L-shape lounge in front of the helm around a weatherproof table. A wet bar with settee opposite on the port side completes the Flybridge comforts.

Engine and Mechanical

When it comes to propulsion, the proven Volvo Penta Inboard Performance System(IPS) has allowed Riviera designers to create a fresh accommodation layout on the new 43' Open Flybridge. With all the major engineering positioned well aft, there are enormous gains in space with the beam-wide stateroom with three bunks with a convertible option to form one large berth with the twin bunks.

Living The Experience cruises at 28 knots with at top speed of 31 knots and a nautical range of 340 nautical miles from her 475 gallon tank.

Exclusions

Owner's personal belongings.
