SPECIFICATIONS

Overview

As specialists in water jet propulsion system for over 45 years, Castoldi knows what it takes to hulls for allowing Castoldi jet drives to enhance its great benefits.

In its own boatyard Castoldi fully manufacture the Jet Tenders, developing and testing hull forms, checking the quality during every productive process while using state of the art materials.

Jet Tenders consist in a range of rigid inflatable boats fitted with diesel engine, water jet drive and the highest quality available equipment for performing the best yacht tender duties.

Jet Tenders can all travel, stable and dry, at more than 30 knots in rough offshore waters, as well as in shallow waters, they can land on the beach and cross at speed sand and mud banks.

Without any exposed rotating parts and protrusion under the kneel, Jet Tenders are the safe for people in the water or on board and can safely cruise at night.

Maneuverability is superb. Jet Tenders maneuver better and faster than boats with traditional propulsion systems in closed spaces as they can used the maximum power (and therefore, the maximum thrust) also at low speed. they are capable of turning on its own axis and to stop in a space of max 1.5/2 times its own length to avoid impacts and collisions.

Basic Information

Category: Tender

Model Year: 2004

Year Built: 2004

Country: United States

Dimensions

LOA: 21' 0" (6.40m)

Speed, Capacities and Weight

Max Speed: 38 Kts. (44 MPH)

Hull and Deck Information

Hull Material: Other

Engine Information
