Fuel Type: Diesel

DETAILED INFORMATION

General Arrangement

The layout on deck consists of a full beam width salon with separate dining area, a large galley forward with country kitchen style dining area, a day head, and a lower helm for inclement weather. Large sliding glass doors in the salon lead to the aft deck area with dining table and chairs. From the aft deck stairs lead down to the swim platform, hydraulic tender lift, storage pods, and engine room. The layout on lower deck consists of three staterooms amidships with ensuite heads and showers and two staterooms forward with ensuite heads and showers. The Lazzara 80 has performance with the Caterpillar 1550 HP engines, Trac stabilizers with the latest upgraded circuitry, and a very desirable 4' 6" draft.

Design Highlights

Spectacular performance and sea keeping ability Custom yacht quality finish in a production yacht Modern engineering throughout all systems Caterpillar C-30 1550 HP electronic controlled engines Speed of 30 knots Twin storage pods at transom for personal watercraft and gear Five luxurious cabins and six heads Separate comfortable crew quarters Exotic cherry wood interior Interior space equivalent to much larger yachts Custom country kitchen galley with center island and dining area Separate dining room area at forward end of salon Large open bridge with hot tub and entertainment facilities Exotic cherry wood interior Large open bridge with hot tub and entertainment facilities Complete electronics package Shipboard monitoring system with ISIS software programs Most complete standard equipment in the industry

rails

Remarks

CRISTOBAL represents one of the finest 80' Lazzaras available in the market place today. She has undergone numerous upgrades including furniture and soft goods within the last few years. She features the reliable C-30 Caterpillars for a very impressive 24-25 knot cruise speed. The 80' Lazzara has incredible volume both in the interior and the flybridge. This is a must see for anyone shopping this market! ** It is reported that in January 2007 the Halon system discharged accidentally while the Caterpillar engines were operating. The Halon was ingested into the Caterpillar engines causing internal damage. The engines were removed from the vessel and returned to the Authorized Caterpillar Service Center, Pantropic Diesel where they were completely rebuilt and reinstalled with a new warranty.

Exclusions

All personal items. A detailed list provided upon request.
