# DETAILED INFORMATION

---

## Description

---

Recognized the world over as one of the vanguards of luxury yacht design and for their intuitive, Italian flair and grandeur down to the smallest detail, MonteCarlo Yachts have long set the benchmark for elegance, performance and safety afloat.

This classic MonteCarlo 65 Motor Yacht is no exception and presents in immaculate condition as a classic example of her Italian designer's and artisan shipbuilder's craftsmanship and commitment to quality and understated grandeur at every level.

Her stylish lines and sensual curves embody the latest design elements and technical solutions you'd normally expect to find on a much larger vessel with her sweeping bow and raked fly bridge presenting a seamless and classic statement in liquid motion. Even the substantial, mid hull portholes become an iconic signature flourish, with their innovative interpretation of the traditional bulls-eye.

The timeless design continues across her sensually curved Portuguese deck as it wraps the fly bridge position leading out to the bow and encompasses the twin sundeck/chaise lounge areas.

The classic lines continue through the seamless integration of Impressive metallic glass supports protecting the lateral walkways beside the helm position, which also features a partially electrically powered doorway to the external walkway and the radar arch, which supports the carbon T-top of the fly bridge.

The boat was designed by the illustrious 'Venetian duo', Carlo Nuvolari and Dan Lenard, two talents who are well known for their ability to constantly renew their designs. Their assured and creative touch skilfully reinterprets classical elements in a modern key, endowing the boat with a timeless style. A style that can be clearly seen in both the lines and the details. For example, the novel profile of the high and flared bow, without a pulpit. Even the porthole becomes a distinctive sign, with their innovative interpretation of the traditional bulls-eye.

This model has all the appealing elements and the design and technical solutions, which you would normally expect to find on much larger boats. For example, the Portuguese deck (the external walkway in front of the helm), which leads to the far prow, separating the two ample sundeck/chaise longue areas. Impressive metallic glass supports protect the lateral walkways next to the driver's seat is a partially electrically powered doorway to the external walkway, and the radar arch, which supports the carbon T-top of the flybridge.

fully optional and state of the art navigation system Tropical Air conditioning (including crew quarter)
