SPECIFICATIONS

Overview

DAYDREAM has been expertly maintained, refitted and upgraded throughout. To give just an example (in addition to what appears in the specs above): In 2012 both drive lines were overhauled, meaning the following: Propeller shafts were inspected and calibrated, propellers checked and balanced, old cutlass bearings were removed and new bearings installed, with both drivelines fully re-aligned. Since then f.ex. the caprails have been made detachable, so that they can be both stored and maintained inside, out of season.

DAYDREAM is a yacht which immediately gives anyone coming onboard a sense of space, both inside and on the vast outside decks. With her fully commercial registry she has proved herself a highly successful charter yacht, both for holiday trips and corporate events. We consider this to be an advantage for anyone contemplating the purchase of a yacht in this size, even if the primary purpose can, of course, equally well be for purely personal use.
