- CLOSED BOW - DOUBLE HEIGHT STAINLESS RAIL PULPIT

Accommodations

The F-42 Sealine is set up with a two cabin 4 berth layout offering a full queen master forward and two doubles and one single set up mid-ship. Each cabin has a private head and shower arrangement, and ample storage with both hanging closets and drawers.

Galley

The F45 is unlike many European designs that offer a small galley in a large yacht, on the contrary this is a very generous galley by any standard and just plain huge for a 45' boat!

With such a well thought out set-up providing ample storage areas for all your groceries, table settings, commissaries, and acres of counter tops for prep work...this the galley for the true gourmet.

Decks

The beautiful teak decks let you know that this is no plastic production boat, the F42 is a proper yacht in every-way. Pay close attention to the details and you will soon realize why this is one of Europe's most popular models with the discerning buyer.

The deck hardware is not only high quality, but is also beautiful adding a touch of jewelry to the yacht appearance. When the time comes to get out of the sun simply activate the hydraulically operated Bimini top with the flip of a switch and you will be dining on the fly-bridge under cover.

The access from the lower decks to the fly-bridge is via a very safe to traverse staircase with wide treads and good handles for stability.

Once up on the fly-bridge you will be treated to your own private resort on the water with beautiful Club-Med style set up of seating and dining areas (see the photos)

The aft deck also offers a lounging area with a built in settee and table. A unique feature of this settee is the flip up armrest that houses a hidden IPS Joy Stick for aft deck operations.

On the bow you will find a large sunbed for two accessed from either side of the boat via the walk around side decks.

Engine Room

At the heart of every proper yacht is a proper engine room, the Sealine F-42 offers the Volvo IPS system that has become very popular due its small footprint, excellent fuel economy and user friendliness.

The engine room location is far aft due to the lack of traditional shafts that create a need for the mid engine layout. This aft engine location shows up in the form of additional interior space, and is one of the primary reason that the IPS powered boats feel so much larger than traditional power setups.

The engine hours are very low, the equipment space is clean and organized with ample room for servicing.

Exclusions

Owner's personal belongings.
