2014 2x 100 W fixed solar panels for charging service batteries + 100W flexible panel for starter and reserve batteries

SunSet MPPT controller for fixed panels + separate controller for flexible panel from 2014

Engine

Powerful 49 hp Perkins engine makes this light 5 ton boat a true seagull in strong winds - the boat easily motors up the wind with good speed. The engine was stripped down to the bolt in summer 2014 in Malta by a professional Perkins engineer, all was renewed and replaced by new original parts. Perkins engines proved to be one of the most reliable and long lasting in the world, this overhauling will ensure thousands of motor hours to come. The engine is never overheated even after motoring for a long time in high seas and has minimal oil consumption. The engine was fully rewired and has an absolutely new panel of gauges, with a water temperature and an oil pressure alarm. The exhaust system was designed to prevent sea water ingress with a high goose neck and a 10lt Vetus waterlock

Sails & Rigging

2014 new set of sails (an overlapping genoa, standard genoa, small genoa, mainsail, mizzen, set of storm sails). A set of old sails (mainsail, overlapping genoa, mizzen, staysail)+cruising shute in very good condition.

All the standing rigging has been replaced in 2014, the old rigging is available as well and still in a good condition.
