Crew Cabin: 1

Crew Sleeps: 3

Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Engines: 3

Manufacturer: Cummins

Model: QSB8.3

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

INTRODUCTION

NISI Yachts and Setzer Yachts achieved a breakthrough with the introduction of the NISI 2400 Vantage series and this highly acclaimed 2011 demo model that won Robb Reports "Best of the Best" 2011, World Yachts Awards - "Best Design 24m" 2011, and ISS "Best Design 24M - 40M" 2011, among others. As the demonstration and NISI corporate lifestyle platform since launching, the NISI 2400 has been lightly used with a full-time captain and crew that has kept her in showroom condition.

The Vantage Series' highly innovative hull was developed in collaboration with Setzer Yacht Architects and designed to achieve these core build values: cutting-edge performance and ergonomics to reduce or eliminate the need for a full-time crew without sacrificing superyacht safety, accommodations and lifestyle. Powered by triple pod propulsion and with hydraulic stabilizers, NISI hulls are designed for efficient, safe and pleasurable offshore cruising with lines similar to America's Cup yachts. Slender, wave-piercing bows transition to slight tapered sections at the stern and run comfortably and efficiently through all seas.

NISI's classic styling cloaks 21st century engineering. The NISI 2400 exceeds the highest level of safety standards and engineered quality. With expedition yacht systems re-engineered for this platform the NISI 2400 is the first yacht under 24 meters to achieve RINA's vaunted charter class. Systems are fitted to luxury superyacht and commercial standards using certified materials and equipment and with an advanced composite Kevlar hull independently tested and certified to exceed class society requirements. The NISI Vantage Series offers casual opulence, distinctive styling with unsurpassed engineering. Solitary in her class, NISI is an attractive blend of simplicity, performance and lifestyle.

Décor The rare art of world class craftsmanship can be found throughout every detail on a NISI. Space flows to create an expansive feel and large windows throughout reveal stunning views. Innovative genius has been infused into every detail of this light and airy expanse. Serene zen-like atmospheres sooth with teak and warm toned materials. Combining exhilarating design elements with modern comfort and convenience, NISI mixes comfort designed furnishings and fixtures with sophisticated color palettes creating dynamic and relaxed spaces.

Layout and Accommodations NISI sacrifices neither luxury nor comfort for simplicity and convenience. The generous open plan of a NISI blurs the lines between indoors and outdoors and allows owners to customize their spaces in wildly romantic, sensual or dreamlike designs.

The expansive main decks are crafted in teak, flowing through the entire length of the

salon and galley, uniting the outdoors and the covered cockpit with the breezy feeling of a loft in Provence.

The sunroof above the helm and the vast panoramic windows throughout connect modern corsairs with the everchanging landscape of sea and sky. South Beach sun decks and decadent sunbeds offer a new level of social relaxation for friends and family. Above it all, secure observation decks and second command stations provide ample seating and comfort for open air cruising above the waves.

Below decks, NISI's elegant staterooms berth eight to twelve and include private ensuite heads and separate shower stalls for each. The full-beam master suite features a magnificent six-panel portal and is located amidship for maximum comfort in any sea condition. The VIP suites, typically situated in the forecastle, afford private and luxurious guest quarters featuring enhanced sound dampening while at anchor or underway. Cabins for guest or crew are the discretion of the buyer. **Naval Architecture & Performance** NISI partnered with world renowned Setzer Yacht Architects to bring core build values to life: cutting-edge performance and ergonomics to reduce or eliminate the need for a full-time crew.

Powered by twin or triple pod propulsion, NISI hulls are designed for efficient offshore cruising with lines similar to America's Cup Class yachts. Slender, wave-piercing bows transition to slight tapered sections at the stern and run comfortably through all seas.

Scale-model tow tests and advanced computer modeling studies played a major role in Setzer Design and NISI's proprietary optimized geometry. **First-in-Class Safety Standards** NISI styling cloaks 21st century engineering. The debut model was the first, and only yacht under 24-meters (78-feet) world-wide to receive commercial RINA Charters + MCA (MGN280) certification and was engineered and built to standards exceeding class requirements.

To achieve RINA's vaunted Charter Class, systems designed for large expedition yachts were re-engineered, including robust passive and active fire prevention systems, stronger water ingress management, water tight subdivision of the boat and enhanced navigational systems. **Engineering** The advanced composite Kevlar hull is independently tested and certified to exceed class society requirements. Systems are fitted to luxury superyacht and commercial standards using certified materials and equipment. All water, fuel, fire-fighting, emergency bilge, and hydraulic systems are fitted entirely with metal plumbing. Engine rooms are encased with aerospace insulation, tested to 1,000°F (538°C), to control heat from reaching guest quarters in the event of a fire for a minimum of 30 minutes.

Salon and other floors are floated with added acoustic insulation. Entire interior forward sections of the hull along the chines and waterline are coated with advanced sound deadening material that further reduces the noise of water-slap, while underway and at anchor. NISI exceeds the highest level of safety standards and engineered quality.

Distinctions NISI 2400 is the recipient of many industry awards and distinctions. Accolades include: FINALIST, “Most Innovative” Asia Boating Awards (May 2011, Hong Kong) WINNER, “Best of the Best” Robb Report Magazine (June 2011, USA) WINNER, “Best Design 24m” World Yachts Trophies (September 2011, Cannes, France) WINNER, “Best Design 24m – 40m” International Superyacht Society (October 2011, Fort Lauderdale, USA) **Accommodations - Hull 7803** There are 4 Owner/Guest Staterooms accommodating up to 8 persons plus 1 Cabin accommodating up to 3 Crew. All staterooms feature ensuite heads.

MASTER STATEROOM

- “The Master’s Door” 500 piece mahogany and teak oversized entrance, Large stainless steel door handle, Magnetic lock with keyless entry code module
- Teak flooring, 100mm planks
