## Overview

---

This 37' Pilot House vessel is constructed on a 20 degree V, 37'3" x 11'8" hull with a spacious cabin and foscle. The handcrafted teak cabin exceeds 6'6" in headroom throughout, with 9 ft width and a standard length of 12 feet. This semi custom design is built by Cold Water Boats in Washington for those customers interested in the qualities only an aluminum vessel can offer. From the low maintenance exterior to the quality construction of the interior, this Pilot House is as comfortable for the discerning fisherman as it is for his concerning wife.

With the pride of quality craftsmanship combined with Cold Water Boat's deep history in the commercial fishing industry, these vessels are a unique combination for the recreational market. For many years aluminum has been the material of choice for commercial applications, mostly in part to its strength to weight ratio and its inherent corrosion resistance. Cold Water Boats combines this with experience in outfitting and carpentry to offer a recreational boat that will withstand the elements on the outside and comfort you on the inside.

The twin Volvo Penta Stern drive model D6-330 duo-prop 330hp will cruise comfortably at 22 knots with a top end of 35. Spring 2016 maintenance is underway including new bottom paint, deck/non-skid repainting, servicing and re-zincing. All ready for launching and sea trials!
