Broker's Comments

The 52 Xanthos has proven to be a very special addition to Windy's exceptional range of sports cruisers and performance yachts. The 52 is a true class leader in terms of performance, handling and quality of build, combined with spacious and luxuriously appointed accommodation. The 52 also offers one of the most ergonomic helm positions on the market.

This is not the boat for everyone, but a boat for those who strive for a superior level of build, ability and finish. In short, the 52 is a yacht for those who take boating seriously.

Construction

Windy are a product of traditional craftsmanship, enhanced with the aid of modern technology. The latest technological innovation is the Wintec hull concept, which gives improved performance, greater strength and reduced noise throughout the vessel.

All the Windy models are CE-labelled. This means that Windy meets all the requirements laid down for quality control documentation and product liability within the EU. In the process of obtaining approval, the company has also introduced new methodologies, construction principals and more advanced construction production equipment, resulting in more cost-effective and quality oriented processes in-house. But above all, Windy is a "Boat Builder" and not a manufacturer of boats, a philosophy which characterises their production staff and all those within their distribution network.

- Modified deep-v hull with mono-hedron hull construction.
- Lightweight PVC foam girder stiffening system.
- PVC foam sandwich construction in hull, superstructure and deck.
- GRP laminate with advanced multi-axial fibreglass mats.

Engine Configuration & Machinery Details

The D12 is one of Volvo's most successful engines ever. A perfect combination of total reliability, outstanding performance and comfort-enhancers that has set a standard other manufacturers wish they could match. Many sports cruisers & fly bridge yachts from the world's leading boat builders are powered by the D12.

- 2 x Volvo Penta D12-800.
- Propeller shaft kw/hp – 553 / 752.
