SPECIFICATIONS

Overview

HEIDENSKIP will be on display at the Palma Superyacht Show from 28th April until 2nd May 2016. HEIDENSKIP is a 25.5-meter aluminium high-performance cruising yacht. Built in The Netherlands by Aluboot Hindeloopen for an experienced owner, this remarkable yacht features twin rudders and a hydraulically operated lift keel. The minimum two-meter draught of 2.00m enables HEIDENSKIP to navigate shallow waters and enter otherwise inaccessible ports. When the keel is fully lowered, she performs outstandingly under sail due to a maximum draught of four meters and low placed ballast. The twin rudders, positioned at 15 degrees angles, are highly efficient when under heel. HEIDENSKIP is an ideal cruiser with no restrictions as to cruising areas; she is ready to go anywhere.

HEIDENSKIP offers three luxury staterooms, catering to up to six guests. Her owner's cabin offers a French-style bed and en-suite bathroom. Her two additional double cabins also have en-suite facilities. An open living space with high and low seating, an integrated kitchen and a navigation corner will make guests feel right at home on board. The perfect outside cockpit has a double steering position partly covered and well protected by a doghouse. HEIDENSKIP's garage is well suited for carrying tenders and toys. HEIDENSKIP has been maintained to the highest standards by her exceptional crew. In 2013, she received a full paint job, which included the boom and mast. All of her sails are from 2014 and all of her systems are upgraded meticulously. Under sail, HEIDENSKIP easily reaches 12 knots and is capable of a maximum 14 knots. She is a performance world cruiser with a strong build.
