- Lev-O-Gage, List Angle Indicator

Vessel Walk-through

The generous cockpit is accessed from an extended swim/boarding platform aft and through a center-line transom door. The boarding platform, which is an extension of the hull, offers non-skid decking, a fold-out swim ladder, and a handheld shower. The cockpit has full overhead cover from the extended flybridge overhang as well as deck hatch access to the lazarette storage area with generator and steering gear access.

The extended fly bridge is very easily accessed by molded non-skid stairs into the starboard side of the cockpit. The aft portion of the bridge can be used for storage or lounging/sunbathing. This area extends completely over the cockpit, allowing for a spacious bridge deck not typical on a vessel of this size. The electronics mast, upper helm station, and entertaining areas are forward. Bimini top with full four-sided canvas and isinglass enclosure. Bench seats with storage underneath as well as propane storage for the galley. In addition there is a table with fold out leaves aft of the helm between the bench seats for entertaining or outdoor dining. All of the bridge seating, table, and the helm console itself have full green protective canvas weather covers and the bridge offers aluminum safety railing, courtesy lighting, and non-skid decking.

From the cockpit, enter the salon thru sliding glass doors. The power distribution panel is conveniently located immediately to starboard. There is a sleeper sofa to starboard, and an entertainment center with storage and counter top space to port. Access the engine room

through removable deck hatches in the salon. Forward to port is the galley area. On the starboard side directly across from the galley is the inside helm station. Center-line, between the galley and helm are three steps leading to a guest stateroom which features a queen-size bed to port and the head compartment with separate sit-down shower stall to starboard. The master stateroom is situated forward and features a queen size island bed with convenient private access to the head.
