SPECIFICATIONS

Overview

FLY was the original Aerorig fast cruising yacht designed by Americas Cup designer Ian Howlett and built by Tom Richardson at the Elephant Boatyard. She is clearly very practical as an ocean going yacht, both in terms of the seamanlike systems above/below decks and their suitability for long passages and/or sailing in remote areas.

The high specification this 'mini superyacht' was built to is self evident from the quality of the stainless steel fabrications, the custom Hyduron (military spec. aluminium bronze) propshaft and seacocks. The walnut joinery and cabinet work was completed by the late Paul Litton, who individually selected the trees from which the interior was built. The design, engineering detail and finish in its day was second to none which was reflected in her build cost some twenty years ago, of over two million pounds.
