# ХАРАКТЕРИСТИКИ

## Обзор

The Viking 80' Convertible is undeniable proof that Viking will never relent in its mission to build a better boat everyday. This exquisite model brings the sportfishing convertible design to a whole new level of performance due to Viking's incomparable design, engineering and production teams.

The Viking 80' Convertible sleek styling showcases an impeccable sheer line with nine feet of freeboard forward tapering to slightly more than three feet at the stern, a lively reflection of the aggressive profiles of its recent brethren including the 92 and 62 Convertibles. The hull's sharper entry merges with a higher forward chine designed to divert spray downward when ripping through head seas. Convex hull sections add curvature and form to the refined running surface, while a quad of molded running strakes accentuate lateral tracking and maneuverability. Tumblehome at the corners of the curved transom adds definition and beauty. Deadrise at the transom is 12.5 degrees and the beam is carried well aft providing exceptional volume, buoyancy and balance, a deft combination, which comfortably accommodates additional fuel, and the weight of a gyro stabilizer.

Mechanically, the 80 Convertible shares a commonality of technical features proven time and time again for reliability and practicality at the thousand fathom line and beyond.

The salon is a forest of satin walnut joinery and leather appointments, created by the team of the William Bales and Company. The 21 ft. 5 in. beam and the use of the vertical space is immediately apparent creating a free flowing movement with the ambiance of a great room. Inviting accommodations include five generously appointed staterooms, including a full beam master suite with a king size walk-around bed. Every stateroom has a large head and fiberglass shower stall. A washer and dryer are located in the companionway.

Viking is sure to surpass expectations with the 80 Convertible. Call today to speak to one of our Viking specialists.

# ПОДРОБНОЕ ОПИСАНИЕ

## Overview/Accommodations

Entered through an electric sliding door on the cockpit mezzanine deck, the salon is a forest of satin walnut joinery and leather appointments, created by the artful direction from the team of the William Bales and Company. The 21 ft. 5 in. beam and the use of the vertical space is immediately apparent creating a free flowing movement with the ambiance of a great room. A day head is immediately to starboard. To port, a J lounge and coffee table is a virtual conference area, opposite walnut cabinetry housing a 60 in. flat screen television on an electric lift. Forward to starboard a raised built-in dinette serves a dual purpose with rod stowage for 80 pound outfits. The fore and aft style of the galley maximizes useful space with under counter refrigeration beneath a second dining area with bar stools, while the outboard counter accommodates a double sink and electric cooktop. Forward of the galley, a versatile walk-in pantry is as spacious as a stateroom and can be outfitted as such.

Inviting accommodations include five generously appointed staterooms, including a full beam master suite with a king size walk-around bed. The port and forward staterooms have walk-around queen beds. The two starboard staterooms have upper and lower berths, and are surprisingly spacious thanks to the use of sliding entrance doors which maximize interior space. Every stateroom has a large head and fiberglass shower stall. A washer and dryer are located in the companionway.

On the flying bridge, a center console command station gives the operator a great view underway and while fishing. Three pedestal helm seats are standard, and additional seating is available on port and starboard lounges, each with rod stowage below. A U-shape lounge and table forward of the console seats more guests, and is notably below the forward sightlines of the helmsman thanks to the raised standing platform behind the console. A freezer is forward between a refrigerated box and a sink with a freshwater outlet. While air conditioning is available on the open flying bridge, a climate controlled enclosed bridge with access from the salon and the mezzanine deck also is available. Additionally, the enclosed bridge convertible also can be ordered with an open Sky Bridge.

Viking's subsidiaries Atlantic Marine Electronics and Palm Beach Towers will outfit the 80 Convertible with communication, navigation and entertainment accessories and its custom tuna tower respectively, which as in the case of all Vikings, allows turnkey delivery from the factory.

The 216 square-foot cockpit is equipped for tournament fishing with a transom door, freezer, tackle, and general stowage space, live well capacity, fish wells, an ice chest and a chill box for drinks. But some subtle touches also show that the Viking team never stops sweating the details to make things better. The base of the cockpit compartments, for example, are floating, which leaves room for a toe kick for easier access when opening the lids in a sea way. Another neat idea is that the mezzanine gently folds outward at each end making more foot space available in the cockpit. Finally, the 80 Convertible is prepped at the factory for the installation of the M26

Seakeeper gyro stabilizer, either on the production line or at a later date.

Like all Vikings, the 80 Convertible is manufactured to order and will provide its owner with a one-of-a-kind sportfishing yacht built and designed to fish and cruise in luxury and safety anywhere in the world.
