## Overview

---

A fast 132 foot motor yacht built by Oceanfast in 1990 on a semi-displacement hull capable of high speed sustained cruising (23knots) motoryacht propelled by MTU & KAMEWA jets. The water jets allow an extremely shallow draft giving the yacht the ability to explore the most beautiful bays not possible in many yachts this size. Hull and superstructure built to design of Phil Curran and Bannenburg. An extremely shallow draft, due to KaMeWa water jets, allows the yacht to explore the most beautiful bays of the Andaman Sea with little restriction, no more long dinghy rides to reach spectacular white sand beaches

Fully refitted in 2003 and constantly upgraded, this superyacht was one of the largest all-aluminium yachts in the world at the time of her launch. Beautiful large oval windows give the salon has an incredibly spacious feel as they almost stretch from floor to ceiling. A Salon area with comfortable sofas is set on port side and to the starboard we have very comfortable lounge chairs facing the windows. All of this combines to create an fantastic area to relax and observe the beautiful surroundings.
