SPECIFICATIONS

Overview

Want to do a little island hopping or long range cruising? With 900+ gallons of fuel and four solar panels, this yacht is fully capable of wherever you want to go! The seller estimates, that with an approximate fuel burn of 2 to 2 ½ GPH at 1800 RPM traveling 6.5 to 7.0 knots and 2 ½ to 3 GPH at 2,000 RPM traveling at 7.0 to 7.5 knots, your travel capacity is approximately 2,000 to 2,400 NM.

It has many updates, and is currently in the process of getting new bottom paint and having her Fireboy engine room fire suppression system recertified, along with a few other touches to make her “near perfect” and ready to go.
