Overview

A Lifestyle of Luxury

Ever-popular Hunter 41 DS continues a timeless tradition of superb interior design, featuring an elegant salon, high-gloss table and custom window treatments, plus zoned overhead lighting. The galley features a stainless steel refrigerator/freezer cleverly housed beneath the Corian® countertop, along with a pantry and custom backsplash. The aft cabins offer twin beds, drawer storage, and entry to the head. The forward VIP stateroom includes a double berth, vanity, storage and private head with shower.

Key Highlights

1. Features three cabins - the aft cabins each feature a double bed.
2. The forward guest stateroom features a double berth plus private head and shower.
3. A stainless steel refrigerator/freezer accompanies dual sinks and a convenient pantry in this wide-open galley.
4. The spacious salon provides cushioned seating for six, with a convertible dinette for additional sleeping space. Systems / Electronics

Raytheon ST7000 Autopilot

The ST7000 Plus is a SeaTalk® compatible autopilot control unit. It can be used either as the control unit for a Type 100/300 Course Computer, or as a repeater, to allow control of autopilot types such as the ST4000 Plus, from a secondary location. It can also repeat instrument data by means of a programmable selection of Data Pages.

The autopilot system uses data transmitted from Autohelm SeaTalk instruments:

- Wind information from a wind instrument can be used for wind trim steering without the need to install a separate vane.
- Track information, from a navigation instrument, provides the ability to steer from waypoint to waypoint.
- Boat speed from the Speed instrument provides optimum track- keeping performance.

The ST7000 Plus can also be used with any navigator (GPS, Decca, Loran) transmitting NMEA 0183 data.

There are five operating modes:

- Standby: Autopilot disengaged.
- Auto: Autopilot engaged and locked onto a heading.
- Track: Autopilot maintains a track between two waypoints created using a navigation system.
- Wind: Autopilot maintains a course relative to an apparent wind angle.
- Manual: Autopilot power steers rudder using joystick control.
- When the ST7000 Plus is being used to repeat instrument data, “pop-up pilot” pages are displayed whenever a change in autopilot control is made. The duration of pop-up pilot pages is user-adjustable.

The ST7000 Plus also provides access to autopilot features such as:

- Automatic tack facility, which can be used in Auto and Wind modes.
- Automatic compass deviation correction.
- Northerly/Southerly heading compensation.
- Automatic heading deadband - seastate control.
- Waypoint advance feature.
- User Setup and Dealer Setup functions, to enable optimum performance to be achieved for a wide range of different types of vessel.

Raymarine C80 Chartplotter

The mid-sized C80 is part of the original Raymarine C-Series Classic line introduced in 2004. It's the perfect choice for installations where visibility is critical, but space is at a premium. It has a 8.4" sunlight viewable LCD with a high resolution 640 x 480 (VGA) display and 256 colors.

The mid-sized C80 is part of the original Raymarine C-Series Classic line introduced in 2004. It's the perfect choice for installations where visibility is critical, but space is at a premium. It has a 8.4" sunlight viewable LCD with a high resolution 640 x 480 (VGA) display and 256 colors.

Raymarine ST60 Instrument Display

The Raymarine ST60+ offers everything from stand-alone display units to sophisticated, fully-integrated systems. Significantly enhanced displays ensure superior viewing angles for both day and night conditions. Simple, push-button controls make Raymarine ST60+ instrument displays extremely easy to use.
