## Overview

For Allmand Yachts, comfort is a vocation, underlying all choices in terms of design or style. Comfort means safety. Allmand Yachts, indeed, is fully compliant with the ECC 94/25 Directive, USCG recorded since 1976, as well as having all its yachts "Ocean" certified as class "A", which guarantees hull strength and safety under any sailing condition, a unique feature for a craft range between 60 feet and 110 feet. Safety also means the ergonomic engine room which allows for access to equipment and engine maintenance with the utmost ease, very strong tanks, to avoid any kind of leak and placed in the midship for a better trim of the craft, a carefully installed electric system to avoid any possible default, a display for immediate control of all on-board functions; easy steering is ensured by solutions which make it possible to steer and moor with extreme ease and precision.

Comfort also covers the concept of smart design, providing ergonomic solutions which ensure acoustic insulation of the engine area, air conditioning systems for customised temperature in each single room, stabilising systems to reduce rolling on board. The large windows, designed to meet the highest safety standards, offer unique contact with the sea, visible also from every cabin. Comfort also means harmony in spaces and materials, top-of-the-range raw materials which guarantee a timeless, though modern and functional product. Livability on board is ensured by solutions designed in order to optimise all available space.
