SPECIFICATIONS

Overview

When it comes to offshore performance the 5000 Vee takes you to a grand scale. The 5000 started it all for Nor-Tech and has evolved over the years into legendary status. In fact the 5000 holds the world record for non-stop from Key West to Cancun and Cancun to Key West. The 5000 remains the benchmark as the ultimate large offshore hi-performance boat of choice. The 5000V set the record twice... 2003 and 2008.

Basic Information

Category: Cruiser

Sub Category: High Performance

Model Year: 2003

Year Built: 2003

Refit Year: 2015

Country: United States

Dimensions

LOA: 50' 0" (15.24m)

Beam: 9' 0" (2.74m)

Max Draft: 3' 5" (1.04m)

Speed, Capacities and Weight

Cruise Speed: 50 Kts. (58 MPH)

Max Speed Range: 600 Kts.

Displacement: 15500 Pounds

Fuel Capacity: 300 Gallons

Accommodations

Sleeps: 2

Total Heads: 1

Hull and Deck Information

Hull Material: Fiberglass

Engine Information

Engines: 3

Manufacturer: Yanmar

Engine Type: Inboard

Fuel Type: Diesel

DETAILED INFORMATION

Von Vessel

This 5000V Diesel Nor-Tech had an extensive refit in 2016. The premise of this refit was to take a proven fast and efficient hull with economical diesel power and change it from a recreational platform to a commercial standard charter boat with luxury comforts. This 5000V is unlike any other. The 2016 refit includes the professionally engineered and fabricated lightweight canopy. The structure is TIG welded marine aluminum extrusion, epoxy coated and painted with matching Awl Grip yacht paint. Glass windows and windshield panels are light gray tinted Solar-E Glass. The custom access hatch for the forward deck folds back out of the way when open and seals when close with high grade SS latches. There are marine windshield wipers and fresh water washer jets on each side of the windshield. Multi-color overhead LED lighting was incorporated in canopy for cockpit illumination. The whole structure weighs less than 200 pounds and keeps the helm area weather tight and air conditioned. The vessel has low hours and an up to date engineering maintenance logs.

2016 REFIT

The purpose of the 2016 refit was to take a proven fast and efficient hull with economical diesel power and change it from a recreational platform to a commercial standard charter boat with luxury comforts. An up to date daily engineering maintenance log exists for the vessel.

The 2016 refit includes the professionally engineering and fabricated lightweight canopy. The structure is TIG welded marine aluminum extrusion, epoxy coated and painted with matching Awl Grip yacht paint. Glass window and windshield panels are light gray tinted Solar-E Glass. The custom access hatch for the forward deck folds back out of the way when open and seals when close with high grade SS latches. There are marine windshield wipers and fresh water washer jets on each side of the windshield. Multi-color overhead LED lighting was incorporated in canopy for cockpit illumination. The whole structure weighs less than 200 pounds and keeps the helm area weather tight and air conditioned.
