## Overview

---

Ferretti Yachts 750 represents another step forward in the development of the Ferretti Yacht range over 70 feet, featuring a 22.36 m overall length and a 5.77 m full beam. Evolution of the successful Ferretti Yachts 720, it features many relevant innovations, both inside and outside. Result from the settled collaboration between Studio Zuccon International Project and the Ferretti Group's team of engineers, architects, and designers, Ferretti Yachts 750 immediately strikes the attention for its outer profile, which is even sleeker and sportier, thanks to the new flybridge with an elongated tail. The model will be presented in its standard version, without hard top; upon request, it can be equipped with a large bimini top, approximately 5 meter long. The flybridge is even more spacious, since it is davit-free. The sunbathing area of Ferretti Yachts 750 is available in other two versions, fitted with roll bar and built-in bimini top, or with hard top and awning. In the outer stern area the distinguishing feature is the electrohydraulic swim platform, more than 1.5 meter long. It can be lowered 50 cm underwater, making the launching of the tender easier. The swim platform can lift up to 450 kg and it can host a tender of approximately 4 meters. Ferretti Yachts 750 will be available with two different engines: two 1381 mph MTU 10V 2000 M84, or, as optional version, two 1524 mph MTU 10V 2000 M93. As for performance, with the standard engines the top speed is 30 knots, with a cruising speed of 27 knots, while with the optional engines, the maximum speed is 32.5 knots and the cruising speed is 29 knots (preliminary data).

## Basic Information

---

**Category:** Motor Yacht

**Sub Category:** Flybridge
