SPECIFICATIONS

Overview

This is one of the largest 68' vessel ever built. She features three owner cabins plus crew quarters in the stern. Her size rivals most 80-90 vessels without requiring the crew needed to operate a vessel of that size. The vessel is equipped with twin C-18 CATs which will cruise the vessel at a decent 18-19 knots while only burning 80 gallons per hour. She is also equipped with twin Northern Lights gens, upgraded electronic WesMar stabilizers, bow thruster, new in 2019 EZ2CY 4 sided bridge enclosure with bridge AC, custom addition to factory hard top for quick disconnect for trips to the great lakes, all new in 2018 interior carpet through, and much more. "Rachel Ann" spent the beginning of her life in the Great Lakes from 2004-2013. Since 2014 she's been stored in a heated shed during the winter months.
