- 10' of chain rode with apx. 100' of 7/16" nylon anchor line
- Quick 12 volt electric windlass at bow with remote control at console

Hull

Construction:

The hull and topside shells are constructed of molded and laminated fiberglass. The hull shell has longitudinal stringers and transverse frames that are integrally bonded by fiberglass to the hull interior as structural components and for partitioning of compartments. The molded topside structure is mechanically fastened to the hull at the perimeter hull flange under the rub rail. Other secondary materials such as composites, textiles, plastics and metals were used to complete the vessel. For basic description purposes, this is a fiberglass vessel.

Hull Design:

Vessel has a raked bow, free board sides and a flat transom stern under the aft integral swim platform. Deep-V bottom design with a 21F deadrise aft.

General Arrangement (bow to stern):

The engine compartment is located under the aft hatch cover. This particular vessel is fitted with the extended swim platform in addition to the integral platform.

- Gel Coat, Arctic White
- Storage, Swim Platform w/Fiberglass Hatch
- Stogare, Anchor: w/Hatch
- Handrail, Stainless-Steel Transom
