ПОДРОБНОЕ ОПИСАНИЕ

Overview

This 61' Garlington was the third in a series built by the original owner. As an MTU Distributor, he installed a pair of series 90-12V-2000, 1350hp "detuned" engines to ensure dependability and longevity. Very few 61's have this preferred engine package. Additionally, he used his previous building experience to further refine and customize the vessel. The boat was sold to its current (2nd) owner in the spring of 2016. That owner, also a prior Garlington owner, brought the boat back to like-new condition.
