**Fuel Type:** Diesel

# DETAILED INFORMATION

## Manufacturer Provided Description

Designed by Jacques Fauroux, the Sun Odyssey 37 combines beauty with performance. The best examples are the smooth roof design and the deck layout. The helmseats set out to the cockpit coamings provide the ideal position for steering. On the performance side, the keel - ballast ratio improves sailing stability, and the generous sail area keeps the boat moving well under all conditions. The Sun Odyssey 37 comes standard with quality sailing hardware. Of note are the Harken two-speed self-tailing winches, the block of stoppers for sail controls led to the cockpit, the genoa furler, the "full batten" mainsail, the electric windlass, and the swim ladder and stern shower for refreshing swims off the stern. Everything desired for safety and comfort is included as standard. The Sun Odyssey 37 is an extremely comfortable boat below. The layout is designed for practical and comfortable cruising. In the two-cabin version, the interior is centered around a salon - L-shaped galley with a traditional nav table to port. Located aft is a very large and well-ventilated washroom with a marine head and shower. The two cabins spread across the full forward beam and, to starboard, the wide space aft. The cabins have comfortable berths, lots of floor space, storage cabinets and lockers, and opening hull ports for good ventilation. All the amenities for comfortable living.
