SPECIFICATIONS

Overview

NOMAD IV is a fantastic sailing yacht that functions superbly for either racing or cruising. She is built entirely out of carbon by the famous architects Finot Conq. NOMAD IV is a 100ft extrapolation from the Vendée Globe Open 60, or from the Volvo Race, and she won the gold medal for the RORC Transatlantic 2015.

While NOMAD IV is unquestionably a performance yacht with state of the art technology (such as a carbon mast and 3DI sails) capable of delighting even the most experienced yachtsmen at the helm, her lateral ballasts guarantee that you can sail her almost flat. Her adjustable keel allows you to sail easily into ports and to access the most beautiful creeks and coves imaginable.

Classification : RINA Hull & Machinery Commercial

Construction : Full Carbon Preg Nomex & Corecell Foam

***hull** : Sandwich construction in a female mould. Solid laminate

around keel
